PERIPATETICO.

Of all the qualities that the American flesh is heir to, there is perhaps none more openly condemned and secretly admired than that attribute vulgarly known as 'brass.' This quality seems to consist of a general unblushingness regarding the making of of the man there. presumptuous requests, or the making of promises. It has a great deal to say for itself on every imaginable subject, and occasionally masquerades as 'smartness,' so called, but is as widely separated from real wit as the heaven from the earth. It considers that every shirking of duty, every evasion of an honorable course is so much clear gain. Young America is oftentimes attracted by this spurious brightness, and occasionally argues within itself that it must take a person of some ability to contrive and execute the various dodges with so much adroitness, but it is not a thing to be coveted, and in the end makes its possessor something to be shunned and disliked, rath er than admired.

of their shallowness, when all at once some sudden occurrence, some exigency brings out a capacity we never dreamt was there, and we reverse our judgment. It someupon ourselves by others. Just so far as we are loadstones to draw out the best in others, just so far do we enjoy their compasunny sympathy, though a light "that never was on sea or land," may work miracles of growth upon a barren nature or cold heart. As the Duchess in "Alice in Wonderland" would say, "And the moral to that

flect upon the delightful grasp of the phrase "all out doors," commonly used as derogatory of various conditions? It suggests unlimited space and breeziness and all things delightful, and could it only be used as complimentary, the "lexicographers of stimulates the workman to industry and carefulness; incites him to frugality; improves his moral, social and political character; provides for him employment independently of the will of the middleman; share of the profits. The communist depends on state hely, the co-operator on self help." the present," as some one calls the originators of slang, would have builded better than they knew.

ed from Ditson & Co sever strumental selections. A song much sung by Mme. Marie Roze is "Jesus Lover of my Soul," the words of the familiar hymn being set to the air of "Sweet Spirit, Hear my Prayer," from Wallace's opera of "Lurline." Mrs. Garrett dedicates a song to Mr. Bartlett, "Look forth from thy Fairy Bower, which is a very graceful little serenade, and a song for bass or baritone is "Tom, the Sailor," by Pinsuti. In dance music there is a vivacious galop, "Our Club," of Stranberg, and "Simplicity," which last selection can also be found in the last number of the Musical Record, published by the

articles of most solid importance are perhaps the one on "Our Land Policy," by George W. Julian, in which the questions Shaler geologically treats of "The Natural History of Politics." "Presidential Electioneering in the Senate," is a noteworthy and briliant paper, and Mark Twain's "Great Revolution in Ritcairn," is a burlesque in his usual style, but with a moral attached thereto. For sketches W. W. Story furnishes his pleasant recital of "A Roman holiday twenty years ago," and there is another collection of "Ghost Stories," by H. B. K. The short story of the number is "Rosamond and the Conductor," a clever and rather amusing production. 'The Lady of the Aroostook" is happily married at the end of her somewhat trying experiences, so that no reader who has depreciated Mr. Howell's sometime habit of ending his stories unhapily, can find the least cause of contention here. The poetry is unexceptionable: Whittier pleads for the Old South in a poem called "The Land Marks," and commemorates the death | nation social at Good Templars' Hall, Tuesof Bayard Taylor by some beautiful and day evening, Feb. 18, for the benefit of touching verses. Longfellow contributes Rev. E. Barry. An invitation is given to "The Chamber over the Gate," written in all who feel willing and able to support rehis most sympathetic and beautiful way. ligion and morality in this place and vicini-Rose Terry Cooke has a spirited description | ty. of the Catholic Rebellion of 1536 in "The Ballad of Christopher Aspe," and a grace- Graves, closes next Friday. ful little poem is "Faint Heart," by Lucy reviews attain their customary worth.

GENERALITIES.

Senator Edmunds is the latest candidate for a place on the Supreme Beneh.

Abbott Academy, Andover, Mass., has counted among her alumnæ no less than twenty foreign missionaries.

Hard usage has so battered up the New York Tribune Turkish war maps as to fit them for European plague maps.

If the doctors keep on cutting up Wade Hampton, they will have to send the pieces to the Senate in order to get the majority

The reforms that the Greenbackers and Democrats would carry out, if they could get the chance, are made manifest by the Maine House of Representatives, which body gave the State printing to a greenback

paper when there were two lower bidders. Olive Logan has been interviewing General Grant, with the following result: "Are you going to be the next President of the United States, General?" "No I am not," he replied. Then, after a pause, he added: 'But I'm going to be their most independent citizen." We have no doubt that the General spoke the whole truth.

In view of the fact that Michigan University needs, and is trying to get, a new gymnasium it might be well for some of "Men cease to interest us when we find the alumni to imitate the example set by a their limitation," says Emersen, and it has recent Harvard graduate, who has given occurred to the Peripatetic to wonder if we that college a gymnasium fitted with a bowl ever do find the limitation of any one. Peoling alley, a running track, rooms for base ple may love us within an inch of our lives, ball and rowing practice in winter, assembly and we leave them convinced that we have rooms for meetings, besides all the usual sounded their natures to the utmost limit appliances for a gymnaium. The building will cost not less than \$50,000.

Speaking of the deaths of Richard Henry Dana and William Cullen Bryant, the New York Evening Post connects the two times seems, too, that we ourselves are in a men as follows: "Accident aided in joinway responsible for the impressions made ing their names inseparably. Mr. Dana was the editor who gave Mr. Bryant's first poem to the world, and when Mr. Dana afterward came to his own as a poet, it was ny. This is not a dogma but simply a sug- Mr. Bryant who, as the editor of a review, gestion, and every one may find its truth discovered the worth of his first poem and for himself. Certain it is that a wide, brought it before the public in the periodical which he controlled.'

> Joseph Cook, whom, by the way, the London Saturday Review lately raked down, recently made the following sensible remarks on the subject of strikes:

"Thirty years of history point to six conlusions. Co-operation obviates strikes; Speaking of slang, did any one ever restimulates the workman to industry and

LOCAL OPTION.

Editor Commercial: I understand that Among recent new music, we have receiv- there is some talk at Lansing among the nbers of the Legislature of passing a "Local Option Law." This certainly would be an easy way out for politicians, as it would enable them to throw all the responsibility back on their constituents. Is it right for men, who were elected to pass laws for the protection of all the people of the State, to pass a law that will enable a part of our citizens to protect themselves from the evils that the liquor traffic entails, and leave the rest at the mercy of the saloon keeper? There are serious objections of such a law. It has been tried in many to our States, but has never been satisfactory. It has often happened that two adjacent which the title page is a partial recommendation: a bright little polka. "Mack." by license system, and secures a revenue from this infamous business; the other washes its hands of all complicity with the traffie, ber of the Musical Record, published by the firm.

The Atlantic for March is one of the best numbers recently given the public. The extistes of most solid importance are sponsible has entailed on the country. The sponsible has entailed on the country. The sponsible has entailed on the county. The greatest objection to "Local Option," however, is that it leaves so many of our citi-George W. Julian, in which the questions zens without any protection from this criminal business. All over the State there are speculation are discussed, and Mr. N. S. nately do not live in a place where the majority are opposed to license. Are they not entitled to protection? Would you be satisfied with a "Local Option Law" if you

lived in such a place?
From all parts of the State petitions are going in to the Legislature asking for the passage of a prohibitory law. This does not mean "Local Option." We ask for a whole loaf; I hope that our law makers will not give us a half a one.

A prominent Republican said recently that temperance men had never asked anything from the Republican party in our State that they had not granted. The Republican par-ty have a two-thirds majority in both branches of the Legislature, and it is in their power to grant us just such a law as temperance citizens want. Will they do it? I hope that the friends of a prohibitory liquor law will not give the members of the Legislature any encouragement to pass a Local Option Law." bassed, let them take the whole responsibil-WATSON SNYDER.

NEWS OF THE WEEK

MICHIGAN.

A Lansing dealer bought 73 skunk skins one day last week. Black command I.50 to \$1.60; spotted, 75 cents to \$1.50. The demand for these pelts comes from Russia.

Booz and Byers, the celebrated Allegan coun ty religious lunatics, have been stirry up a great breeze in Bellevue township, Eaton coun-ty, resulting at last in the school house where they held forth being visited with ropes and a mild insinuation of a hanging bee. Women fainted, and a great uproar ensued, in the midst of which the apostles dug out.

Mr. Ambrose Atwood, a well-known lumber of Maple Valley, Montcalm county, died Wednesday morning.

A fire in the Stephens' block at Mount Clemens, Tuesday evening, did about seven thousand dollars worth of damage.

A log road is about to be built from some northern station on the Grand Rapids and In-diana Railroad to the Manistee River, the work to be done by a prominent lumbering firm at Manistee. Four locomotives have been ordered from Pittsburg.

The first Teachers' Institute for Emmet County, was held at Little Traverse, on Friday and Saturday, January 31 and February 1. The attendance was quite large, and an interesting meeting was had.

A fire at Ovid Wednesday night destroyed Sowers & White's bank, Beebe & Covert's drug store, Mrs. Beattie's millimery store, J. H. Randall's barber shop, and D. C. Harrington's justice office. Loss from \$8,000 to \$10,000; in-

John W. Hurley, arrested in Lenawee county on a charge of firing his house, by which his wife and two of his children lost their lives, has been acquitted.

The biennial report of the Kalamazoo Asylum says that October 1 last the asylum contained 618 patients. During the past two years 519 have been admitted, and 640 discharged, leaving 497 under treatment. Of those discharged 117 recovered, 195 improved, 246 were the proposed and 81 died. The normal cases of the containing not improved, and 81 died. The normal capacity of the institution is 550, but the daily average for the past two years has been 645, and last spring and summer was over 700.

The report of the Pontiac Insane Asylum states that the capacity of the building is sufficient for 330 patients, and the institution is

At a meeting of the Regents at Ann Arbor, Thursday evening, Prof. Rose was reinstated Assistant Professor of Physiological Chemistry at a salary of \$1,500, and his sureties were released from the payment of the \$5,000 judgment which the University held against them. Regents Clime, Duffield, Maltz and Rynd voted for the resolution and Regents Cutcheon and S. S. Walker against it, Regents Grant and E. C. Walker being absent. C. Walker being absent.

J. S. Heath, of New Boston, Wayne county, committed sucide at Kalamazoo, Friday by shooting himself in the head. He had gone there to get married, but the proposed bride's father interfered, with the above result.

Dr. H. A. Reynolds, the red ribbon reformer has begun a second campaign in Michigan. He spoke Friday evening at Ionia to about 500

Prof Geo. S. Morris, of the University, has received an offer of a professorship in the University at Baltimore, and it is said he will ac-

Pontiac is to be written up and illustrated in the New York Graphic. It was formerly the home of the proprietors of that paper.

Jackson Patroit: Of the children attending what is known as the Gravel school-house in Summit, seven miles from this city, seventeen nave died of diphtheria, since the beginning of inter. At Grass Lake there were eight deaths this disease, which has finally disap-

A telegram from Boston states that a match been made for Col. J. H. McLaughlin and William Miller of Boston, on February 15, Græco-Roman, with tripping, for \$500 a side.

The Michigan Central has been doing a very tive business of late, its entire equipment

The best paying railroad in Michigan, as shown by the reports for the past year, is the Detroit, Lansing & Northern.

The democratic State Convention is appoint ed to meet at Lansing on the 28th day of February.

The Hon. Uzziel Putnam, of Pokagon, died Monday morning, aged 52 years. He was the first white child born in Cass county, and had always lived within 80 rods of his birthplace He had represented his county in both branches of the Legislature, besides holding many other offices of public trust.

The amount of salt inspected during Janu ary was 87,505 barrels. Gotlieb E. Rivard, a lad 16 years of age, was

instantly killed by a falling tree at Sebewaing Dr. H. S. Hitchcock, of Lansing, dealer in

books and notions, has made an assignment to Hon, James B. Porter. Assets unknown. Li-abilities about \$8,000.

By an accidental explosion of blasting pow-der at the Champion Iron Mine, Marquette county, a few days since, Samuel Bennett and John Rutter lost their lives, and John Danielon and Joseph Framboc were seriously in-ured. Both of Danielson's eyes were blown out, and it is thought he cannot recover. Miss Lena, daughter of Rev. W A. Bronson,

of Orleans, Ionia county, in rashly endeavor-ing to cross the railroad track in advance of an approaching train, was struck by the cow-catcher and thrown some distance. Her under lip was torn off, her jaw-bone ractured, two r three ribs fractured, besides a rious inter-

Mr. and Mrs. Giles Kellogg, living near Charotte, celebrated the 60th anniversary of their wedding January 24.

One of the results of the superstition of One of the results of the superstition of other days was revealed one day last week, on the farm of N. Phillips in Milan. A son of Mr. Phillips was chopping down a large elm tree, when he discovered a plug which had been driven in the wood and covered by the growth of the tree. Carefully removing the plug, he found a bunch of leaves in which was wrapped a lock of hair, and two quite large pieces of toe nails. These were probably de-posited there to frighten away witches or de-

The tug Miranda, owned by Storch Bros. was destroyed by fire at the dock in Saginaw City Tuesday morning. She was insured for \$3,000, which will cover the loss.

The Grand Lodge of the Knights of Honor began its annual session in Grand Rapids on Tuesday. The order has 2,700 members in the State, 25 new Lodges having been organized

The Legislative Committee investigating the Kalamazoo Asylum have been sitting with closed doors and up to Tuesday had examined 25 witnesses and taken over 1,000 folios of testimony. It will probably be several weeks before they make their report.

A meeting of the state band leaders has been called at Lansing for March 5, to decide place for holding the next state tournament.

Bay City Observer: A heavy fall of snow ook place on Saturday and Saturday night in the vicinity of Gaylord, extending quite a distance in this direction. Monday morning the snow was three feet deep on the railroad track.

The biennial report of Insurance commissioner shows that the risks written in Michigan during 1878 aggregate \$147,887,972; premiums received, \$1,730,126. Losses incurred whether adjusted and paid or unpaid), \$920,-56. Losses paid, \$899,326. The losses incurred in this state by these companies in 1878, were less by over \$400,000 than in the year

The new mineral discovered on the north shore of Lake Superior has been named "Huntilite." after Dr. T.S. Hunt, of Montreal. It contains large proporsions of silver and arsenic mixed with iron, zine, cobalt, and sulphur.

GENERAL NEWS.

A terrible double tragedy occurred at Brightsville village, Southern Illineis, Monday night. Charles C. McAuliffee, physician, invited his wife and her brother, Mr. Heavener. into his drug store, and, after drinking with him, shot him dead with a shot gun. The docter fled, but was found by constables, and before they could get him to jail an infuriated mob of 50 persons seized him and hung him to a limb of a tree.

The Comptroller of the Currency reports The Comptroller of the Currency reports that the total amount of bonds held by National banks as security for circulating notes on the 1st of February was \$348,938,200. Of this amount \$67,961,650 were six per cent. bonds. The banks also hold \$184,856,300 five per cents. There are also held by banks \$43,578,550 four and a half per cents., and \$52,542,700 of four per cents. Amount of National Bank circulation on the first inst, is \$322,930,849. tion on the first inst. is \$322,930,849.

The President has nominated Digby V. Bell s collector of customs at Detroit, a reappointment. Also Algernon S. Badger collector of customs at New Orleans, vice Geo. L. Smith, to be removed, and Wm. L. McMillan postmaster at New Orleans, vice Badger.

J. Madison Wells, Louis M. Kenner, and G. Cassnave, the Returning Board of Louisiana, appeared Thursday before the Superior Criminal Court, withdrew their plea of not guilty. and filed a demurrer to the information against them. Judge Cullom, their counsel, claimss that under the decision of the Sunreme Court of March 20, 1878, in the case against C. Anderof match 20, 100, in their case, which the Attorney General refuses. The demurrer is filed for Thursday next. The At torney General holds that the decision in the Anderson case is not res adjudicata, and holds that it is only good in that case. As several decisions of the present Supreme Court have afterward been changed, he is of opinion that the court may do so also in the case of the Returning Road. turning Board.

A Topeka dispatch says that a resolution was introduced into the House Thursday afternoon charging that bribery and corruption had been resorted to in the late Senatoria election; that even members of the House had offered money for votes, and providing for a committee of five to fully investigate the matter; also all charges of corruption in office made against the recently elected Senator. A lively debate followed, and a substitute was offered, and a motion made to make the resolu-tion concurrent, which was voted down. Fi-nally the resolution was adopted by a vote of 68 to 56.

A resolution was passed in the Kansas Sen A resolution was passed in the Ransas Sena-ate similar to the one passed by the House, ap-pointing a committe of five to investigate the charges of alleged corruption and bribery in connection with the late United States Sena-torial election. Concurrent resolutions were also introduced having the same object but were laid over under the rules.

A fire at Ripon, Wis., destroyed Runel's A fire at lapon, wis, destroyed thater's block and a portion of Allen's block. The postoffice was located in Runel's block, and was entirely destroyed, together with all mail matter, records, funds, public documents and private papers of the postmaster. Total loss about \$13,000. Insurance \$6,000.

The nomination of ex-Gev. Hartranft for postmaster at Philapelphia, was a genuine sur-prise, and it was quite as much of a surprise to discover that Gen. Hartranft, who has been a Presidential candidate, and a leading man for a Presidential candidate, and a leading man for the Berlin mission, snould be willing to accept it. But he is poor, and must do something. Nobody knew anything about the appointment, not even Postmaster General Key, until he came to the Cabinet meeting a few minutes before the nominations were made. The President has made several important nominations lately without consulting the Cabinet officers under whom they came.

The Chinese crew of the Australian bark Kate Waters, from Hong Kong for Foo Chow mutinied, murdered their officers and scuttled

The ship Van Dieman was sunk by a colli-The snip van Dieman was sunk by a colli-sion with an unknown vessel. Two of the crew were picked up in a small boat. They report their shipmates and the crew of the un-known vessel as probably drowned.

Six men, who had been arrested for commit Six men, who had been arrested for commo-ting a number of robberies at Seymour, Ind., were taken from jail Saturday by a body of men, who marched them out of town, divested them of their clothing, gave them a severe whipping and then set them free.

Machinery Hall, on the Centennial grounds at Philadelphia, which originally cost \$800, 000, was sold at auction Saturday, to W. C. Allison & Co., for \$24,000.

G. F. Simmons, of Troy, N. Y., crazed by th elopement of his wife, poisoned his three children and cut his throat.

Advices from Belleville, Ill., say Geo. W. Sie ber, treasurer of St. Clair county, is a defaulter or about \$30,000. His assets amount to som \$15,000 and the balance, it is said, will be promptly paid by his bondsmen.

The old Asbury University building at Green The old Asbury University building at Green Castle, Ind.. occupied by the preparatory departments of the college, the museum and the Whitecomb library, and also as the armory of the Asbury cadets, burned Monday afterneon. The building, which cost \$28,000 in 1828, is a total loss, as is also the museum, valued at \$5,000. The Whitecomb library, valued at \$10,000, is damaged one-half. The fire originated in the bell tower from a defective flue.

A Council Bluffs, Iowa, dispatch says the a Council Bluits, towa, dispatch says the surviving seven Cheyenne bucks, captured near Fort Robinson, Nebraska, after a desper-ate resistance, were taken through Council Bluffs Monday evening, en route to Fort Leavenworth, where they will probably be tried for the murder of white settlers in Kansas. Besides the braves there were 14 women and children in the party, wives and children of

Wm. Runpon and wife and Greenville Grent and four of his family, at Queensville, Ind., were poisoned Saturday by eating buckwheat cakes. It seems a farmer named Hall had put arsenic in his barn to kill rats. A portion of it became mixed with buckwheat which was afterwards sold to the parties named. Run-yon is quite ill, the others will probably re-

The report is received that a gorge Missouri River at Glasgow, Missouri, destroyed a span of the railroad bridge which is being built for the Chicago and Alton Railrood by the American Bridge Company of Chicago. Loss, \$30,000.

Under the direction of the court a New York jury gave a verdict for the defendants libel suit instituted by the Rev. Fred. Brooklyn, evangelist. The court said that in the evidence of Bell himself, the libels were shown to be true and they were published for

the public benefit. A national conference of colored citizens will be held at Nashville, May 6. The object of the conference is to consider the situation of the colored citizens in the South relative to the enjoyment of life, liberty and property, also their educational, moral, social and political condition, and the question of immigra-

A fire five miles north of Milwaukee de-A fire five miles north of Milwaukee destroyed a group of buildings owned by Chas. Herman. The property destroyed included a flouring mill, a starch factory, and five drying kilns used for drying peas and starch. Loss, \$30,000; no insurance.

In the billiard tournament at New York city Schaefer was awarded first prize, \$1,000 in gold and sılverware, and Slosson. Sexton and Daily the second, third and fourth prizes.

The embankment at Zeigler's ore beds, 15 miles from Allentown, Pa., has caved in, burying 11 persons, killing one and seriously injur-ing four.

A terrible accident occurred at Kansas City Tuesday morning at the foot of Grand avenue in a cut being made for the Chicago and Alton in a cut being made for the Unicago and Alton Railroad. The cut, with its almost perpendicular walls, 90 feet high, caved in and buried the workmen at their teams. There were four teams in the cut at the time, and ten men working at each team. Besides these there were the foreman, Jos. McCarthy, his clerk, and two men working with the pick. Six persons were killed outright and several wounded.

FOREIGN NEWS.

A dispatch from Vienna, on Friday states that from 15 to 20 fresh cases of disease resem-bling the plague occur daily near Xanthi, Thessaly, and there is great mortality from the same cause at Raslog.

A London dispatch on Friday says: estimated that from thirty to thirty-five thou-sand men are now on a strike at Liverpool. The demeanor of the crowd yesterday was The demeanor of the crowd yesterday was most threatening, in consequence of the sailors joining the strikers. The laborers employed in the provision trade also struck. At Waterloo dock the mob broke up the staging and did much damage. After their expulsion by the police they endeavored to storm the gates. At Prince's dock the mob boarded the bark Cora, from Wilmington, N. C., which was unloading her cargo of rosin, and extinguished the fires in the donkey engines and cut the hoisting gear. The mob numbered about 3,000. Smaller mobs terrorized laborers at Rueen's, Nelson's and Bramley Moor docks. The police were reinforced last night, especially near Sailors' Home. A number of laborers, sent to Liverpool from Wolverhampton, were compelled to return by threats of murder. threats of murder.

England has concluded a convention with Turkey, purchasing the state domains in Cyprus, with the exception of the Sultan's private estates.

The British government is not inclined to interfere with the importation of cattle from America, provided there is adequate inspec-tion before shipment and lairage at Liverpool. The trade say American shippers need not

CONGRESS.

Feb. 5.-In the Senate Mr. Mathews's (Rep. (A.) resolution for a commission to inquire into the claims of citizens against Nicaragua

into the claims of citizens against Ricaragua was agreed to without discussion.

A bill passed appropriating \$4,933 to pay the Richmond Female Institute, Richmond, Va., for the use of its buildings by the army of the United States, from October, 1865, to Octo-

Mr. Hamlin (Rep., Me.) presented a letter from the Secretary of State saying that the family of the late Bayard Taylor, United States Minister to the German Empire, was not in affluent circumstances, and recommending that the salary of the Minister to Berlin be contin-

ued to Mrs. Taylor for one year. Referred.

The Senate resumed the consideration of the resolutions of Mr. Edmunds declaring the validity of the Thirteenth, Fourteenth and Fif teenth Amendments to the Constitution of the United States, and Mr. Whyte (Dem., Md

United States, and an. The spoke in opposition thereto.

The question then being on the resolutions as submitted by Mr. Edmunds, he demanded a submitted on each resolution. The first separate vote on each resolution. as agreed to by a vote of yeas 23, nays 17, a

party vote.

In the House the report of the Committee on Elections in the Florida contested case was submitted, in favor of Jesse J. Finley and advertised the claims of Horace Bisbee. The

vertised the claims of Horace Bisbee. The minority submitted dissenting views, and both reports were recommitted.

The House went into committee of the whole, Mr. Carlisle (Dem., Va.) in the chair, on the Army Appropriation bill. The number of aides-de-camp to which the general of the army shall be entitled was increased from three to four. Mr. White (Ren. Pa.) offered as an to four. Mr. White (Rep., Pa.) offered as an amendment to the bill substantially the bill known as "The Army Reorganization bill."

Mr. Banning favored the amendment. He moved that the committee rise, in order that the amendment might be printed. This was opposed by Messrs. Garfield (Rep., O.) and other Republicans who wished to have the vote taken at once, but it was agreed to, ays 106, and 106, are 106.

Feb. 6.—In the Senate Mr. Blaine presented Feb. 6.—In the Senate Mr. Blaine presented a memorial from manufacturing companies of Maine representing twelve million dollars capital, and employing thousands of persons, asking an appropriation for mails from and between one or more North Atlantic and South American ports. The memorialists say that the money will be returned in increased commerce. The memorial was referred.

The House went into committee of the whole. Mr. Carlisle (Dem., Ky.) in the chair, on

whole, Mr. Carlisle (Dem., Ky.) in the chair, on the Army Appropriation bill. The pending amendment was Mr. White's, offered yester-day, which comprised most of the features of the army reorganization bill. The amendment of Mr. Beebe (Dem., N. Y.), authorizing the President to appoint George Foster Robinson paymaster in the army was rejected, yeas 60,

Mr. Page (Rep., Cal.) offered as a substitute an amendment authorizing the President to transfer the care and control of any of the Indian tribes to the War Department temporarily whenever he should deem it advisable to do so on account of hostile action on their part against the United States, or in case of any difficulties arising between them and set-

order, pending which the committee rose, and the House adjourned.

Feb. 7th.—In the Senate, Mr. Hamlin, (Rep., Me.) from the Committee on Foreign Relations, reported back the Senate bill to restrict the immigration of Chinese to this country, and the committee was discharged from further consideration. He then reported back ther consideration. He then reported back

the House bill for the same purpose, and asked that the committee be discharged from fur-ther consideration, but that the bill be placed on the calendar. With this request he gave notice that, when the bill came up, he would

move its indefinite postponement.

The Senate took up the bill which provides that any woman who shall have been a member of the bar of the highest court of any State or territory, or of the Supreme Court of the District of Columbia for the space of three years, and shall have maintained a good standing before such court, and who shall be a person of good moral character, shall, on moperson or good moral character, shan, of mo-tion and production of such record, be admit-ted to practice before the Supreme Court of the United States. After discussion the bill passed without amendment, yeas 40, nays 20. In the House, the Senate amendments to the Naval Appropriation bill were non-concur-

red in.

Mr. Baker (Rep., Ind.,) from the conference
committee on the Fortification Appropriation
bill, reported that the committee had been e to agree, and asked for further conference. Agreed to.

Feb. 8.—In the Senate Mr. Windom (Rep. Minn.) from the conference committee on the Indian Appropriation bill, submitted a report. Agreed to, and the bill passed. The total amount appropriated is \$4,713,206, \$33,058 less than the appropriation for the current fiscal year.

The conference committee's report on the bill to abolish the volunteer navy was agreed to. The bill allows all officers mustered out one year's pay. It affected one line officer and twenty-six medical officers. Provision is made for the admission of medical officers to the medical corps of the navy after examination. House bill providing for the payment to the officers and soldiers of the Mexican war of three months' extra pay, provided for by the act of July 19, 1848, was passed, after being amended to provide that the act shall include officers and men of the army, navy and marine service. bill to abolish the volunteer navy was agreed

In the house the day was spent in consider ing the army appropriation bill. Mr. Cole (Rep., Mo.) offered an amendment requiring the inspection of supplies by quartermaster or

commissary nearest the place of successful bidder. Agreed to.

Also the amendment that Indians who settle

Also the amendment that Indians who settle on lands under the homestead or pre-emption laws on purchased land shall be free from the control of Indian agents.

The original proposition for the transfer of the Indians to the War Department was rejected on a vote by tellers—yeas 88, nays 101. The result was applauded by the Republicans, the proposition having received only six or eight affirmative votes on that side and only about a dozen negative votes on the Democratic side. The first vote was on the following amendment offered by Mr. Butler: "And telegrams are authorized to be transmitted by railroad companies that may have telegraph lines for the panies that may have telegraph lines for the government and for the general public at rates to be fixed by the government according to the provisions of title 65 of the revised statutes of the United States." The amendment went was adopted

ment was adopted.

The amendment for the reorganization of the army was agreed to, yeas 116, nays 92.

The amendment offered by Mr. Hewitt (Dem. N. Y.) to expunge the authority to have troops at the polls on election day "to keep peace" was adopted, yeas 110, nays 95, a strict party vote, with the exception of Mr. Brogden (Rep., was adopted, yeas 110, nays 95, a strict party vote, with the exception of Mr. Brogden (Rep., N. C.) who voted in the affirmative with the Democrats.

Mr. Culberson (Dem., Tex.) submitted an expendent reaches the latest and the strength of the strength o

amendment repealing the law which requires that military headquarters in time of peace shall be established at points where the government owns buildings and barracks. Adopt-

The bill then passed. Feb. 10.-In the Senate Mr. Withers (Dem. Fieb. 10.—In the Senate Mr. Withers (Dem., Va.), presented a petition of the Catholic Young Men's National Union, protesting against the discrimination made by the Government in appointing chaplains in the army and navy, by which Catholic soldiers and seamen are deprived of the benefit of their religious and in the armoint and in the region and in the armoint of Indian again. gion; and in the appointment of Indian agents, whereby vast numbers of Indians who are Catholics are placed in charge of denominaions in which they have no interest or confidence. Referred.

In the House the motion to suspend the

In the House the motion to suspend the rules and pass the bill repealing the law in regard to the test oath of jurors, and also the law for the appointment and payment of supervisors of election and their aids, were rejected, yeas 126, nays 113, not the necessary two-thirds in the affirmative.

Famous Violin Makers.

No one can say just when violins were invented, but it is certain that, though the principle of this instrument strings set in vibration upon a sound ng-board—was known in the earliest imes, the world still went on harping and drumming, playing on pipes, ta-bors, lutes, dulcimers, and other instruments, of which we have no patterns, for more than five thousand vears.

The first violin is said to have come from the workshop of a studious old instrument-maker. Gasparo di Salo, who lived in the village of Bresica, in northern Italy, toward the last of the sixteenth century. He gave the violin its present shape and size, and its name, which signifies "little viol." After him, in the same town, came many other makers whom we need not recall, till we come to the famous name of Amati.

Andreas Amati lived in the neighboring town of Cremona, and spent his time making viols after the fashion of the day. But it was a poor fashion, he thought; and when he heard that Gasparo di Salo had made great improve-ments and changes in the instrument, he journeyed to Brescia, entered Gasparo's workshop, learned all that was taught there, and then, burning with new ideas, he went home and established in his native village the celebrated school of Cremona violins. His sons were brought up to their father's trade, and they handed the secrets of it to their sons, who, in turn, altered and shaped and invented, seeking per-

About a hundred years after Gasparo di Salo had sent his violin into the world, a young man named Antonius Stradivarius was among the pupils at the Amati school. He was a slow, silent youth, not remarkable for anything excepting his close attention to his work and his careful study of his master's instruments. Even after his apprenticeship was over, and he had started his own workshop, he clung to the old patterns, copying them in every detail, both faults and merits, and often signing them with the name of his master, Nicholas Amati. But one day he seems to have waked suddenly to clearer sight, and he said to himself:

"There's more music in wood and strings and horse-hair than has ever yet been brought out. Antenius, that is your work to do."

So he set about this newly revealed task with that quiet zeal and infinite patience which we describe by the word "genius." For twenty years he shut himself up in a lonely workshop.

All the long time between early manhood and middle age he spent before a work-bench, with compass or tool in hand, experimenting with his materials, testing, studying, and applying their properties and resources. He was fifty-six years old before he was satisfied that he had reached the best results of his studies, and then, full of knowledge and power, he began, in 1690, to make violins with wonderful rapidity, sending them throughout the musical world, where their surpassing merits made them and the name of Stradivarius famous forever.

When we think of the slow growth of the violin, advancing only by centuries, we can scarcely understand why a thing so slight, so apparently simple, should have required six thousand years for its perfection. But what was the problem which the makers of the violin had set themselves? Sim-The Boston Statesman, in comment- ply this: to create a human voice. The air was filled with music; sweetest of all were the voices of women. No instrument expressed the shrill, clear, vibrant quality of a soprano voice. Beside it, the tones of harps, lutes, guitars and spinets were hollow and vex-Each violin-maker then sought, with his bits of wood and strings, to put the air in motion to gather the sound-waves and confine them in the wooden shell, and send them back to us in tones which should be brilliant, flexible, true, and mellow as the loveliest singing voice—a voice without a human body, and yet one which should thrill us as if started from a human

soul. This was an immense problem, only to be solved by countless practical experiments. The theory of acoustics, which our latter-day philosophers have made so plain, had not been formulated, and these old workmen worked in the dark, sure of nothing till they tested it. The least alteration in the curve of the lines, or thickness of the wood, or in the proportions of one part to another, cost years of study, with daily comparisons and failures. The materials were few; but a thousand variations of sound, volume, and quality of

tone could be produced. It would be foolish to say that Stradivarious and his fellows worked without method in a hap-hazard way; but they certainly made laws for themselves, and these laws are based upon scientific principles so exact that Pro-fessor Tyndall himself can use nothing which proves and illustrates his lectures on sound so thoroughly as a Cremona violin. As to creating a human voice, that is done so exactly with every shade and turn of expression that singing-masters say no voice can be perfectly true which has not been trained by the violin, instead of the jangling piano-forte.—M. D. Ruff, St. Nicholas for February.

Prurient Preaching.

Some years ago a minister in New York City made a great sensation by advertising a sermon to thieves and harlots. The house was crowded, of course, with people who wanted to get a good look at the wicked people who, for their part, did not come. This kind of prurient interest is easily excited by any discussion of social evil that is trumpeted. It is only the minister of firm but delicate touch who can advantageously treat such topics at all, and he will not use them as baits to catch gudgeons with. Such themes are sure to excite curiosity, whether they be treated in the pulpit, or the daily pers, or the weekly dreadfuls; but the chief purpose of the moral reformer should not be to excite evil curiosity. A certain kind of pathological informa- about it."

tion a reformer needs; but it is not information to be generally disseminated. About all such evil a pure spirit will say, "O my soul, come not thou into their secret!"—Scribner.

Household Education:

The Agricultural College of Towa, has a department in which practical instruction is given to lady pupils in the various arts of the household, sewng, cooking, house furnishing, care of elothing, canning of fruit, etc. department is under the immediate supervision of Mrs. Welsh, wife of the President of the College, and in her last report she speaks very encouragingly of the progress made by her pupils, and the spirit with which they entered upon these unromantic studies. Nothing of the sort has, we believe, ever been attempted in connection with the Michigan Agricultural College, but it is not too late to hope that something in that line will some day be, not only attempted, but carried to complete success. The farmers' institute at Charlotte passed a resolution unanimously asking the Legislature to make such an appropriation to the college as will enable it to receive and instruct girls as well as boys. The burthens of farm life fall quite as heavily upon the farmer's wife as upon the farmer, and there appears no good reason why she should not be as well prepared for her duties as he.

The tendency of the time is to infuse more practical knowledge into the education given in the schools. The higher mathematics, the classics, the fine arts and the rest are all very fine, but very few of us can earn our bread and butter by devotion to these elegant studies. In fact a very large proportion of the young men and women now in the schools will have to earn their living on farms and in workshops, by plowing, hoeing, cooking and washing as their fathers and mothers have done before them. These homely old fashioned industries will be improved and ennobled by the better education of the persons engaging in them, and industrial schools have for their object the special preparation of boys and girls for just such useful vocations. It has been said that the wisdom or folly of legislation, the beauty of art and the soundness of theology all depend on the popular digestion, while a noted wit is credited with saying that no man can stoop to a dirty act who has on a clean shirt. There is a large share of truth in all this, enough at least to show that a well conducted kitchen and a clean laundry are great moral forces and that among the educational institutions of the future will be schools for giving instruction in the arts and sciences of the household.

What to Do in Accidents. Dr. W. H. Vail gives the following

sensible advice to parents, nurses and all others who may have the care of children:—A child rolls down the stairs, or falls from a height, and in either case strikes its head with force. We would give the following directions, as nearly as possible in the order in which they should be adopted: Raise the child gently in the arms, and carrying to the nearest sofa or bed, place him upon it—unless crying loudly, when he can be soothed quickest in the mother's arms. All the clothing should be loosened, especially about the neck, to afford the freest circulation of the blood to and from the head. To equalize the circulation and prevent inflammation the head should be kept cool and the extremities warm. Cooling lotions of arnica or witch hazel and water, or simply, water should be applied to the head on thin cloths, well wrung out so as not to wet the pillows and bed clothes. Not more than two to four thicknesses of linen should used, because thick cloths prevent evaporation, and what was intended to cool the head acts as a poultice and makes the head hotter. Ice and icecold water should not be used unless the head be very hot, as it is believed children have been killed by the application of pounded ice to the head. Bottles of hot water or hot irons are all that is necessary, besides the bed clothing, to heat the extremities. All applications of mustard and other irritants possess no advantage over these, and have the disadvantage of disturbing the sufferer. Should the patient's face be very pale, and signs of fainting appear, camphor or ammo-nia should be applied to the nostrils, and a little brandy or wine be given. Then the room should be made as quiet as possible and every means used to invite "Nature's sweet restorer," sleep. We know the popular idea is that patients suffering from any injury to the head should be kept awake by all means; and it is mainly to combat this erroneous notion that we are prompted to write out these directions. injury-or degree of injury-of the head contra-indicates the sufferer's sleeping. In fact positive harm may be done in trying to prevent sleep. Rest is what the brain and blood vessels want more than any one other thing; and, if not allowed, what would have passed off in a few hours or days may be prolonged into inflammation, with all its dangerous cosequences. Of course the air of the room should be kept pure-windows and doors open if the weather permit—and the presence of persons not absolutely necessary forbidden.

Some facts tending to show a partiality on the part of white butterflies for white flowers, and a similar liking of yellow butterflies for yellow flowers, are given by Dr. A. S. Packard, in the Naturalist. A remarkable migration of large, brown butterflies observed near South Natick, Mass., in October last, is described in the same journal. Eor nearly an hour the line of butterflies was seen moving steadily overhead from north to south, flying generally in pairs, six or eight feet

A very clever woman said: "I do not wish anybody to do anything naughty, but if they do, I want to know all

IN THE CRUCIBLE.

Michigan Soils, and the Resu of Their Chemical Analysis.

It will be remembered that at last State Fair Prof. Kedzie, of State Agricultural College, made exhibition of Michigan soils collect from different counties and subject to careful chemical analysis. None practical chemists can realize the pair taking labor such a task involves, a perhaps few others can fully apprecia the important bearing such a work on the agricultural development of State. We take pleasure in laying fore the readers of THE HOMESTE the results of Prof. Kedzie's labors.

These soils have been gathered main from the newer portions of our Sta The exhibit is made to furnish means for estimating the agricultu capabilities of our northern count For this purpose four methods are ployed: 1, the chemical analysis; statement of the kinds of timber nat ally growing on the soil; 3, exami tion of the relations of the soil to war 4, the soils themselves are exhibit that the public may judge of the physical properties. A few specime of soil of well-known fertility, from the older portions of the State, are in duced for purposes of comparison, b as to chemical composition and ph cal properties. In the circular p lished last April, asking for contri tions of soils for analysis, is the foll ing passage:
"To carry out the design, I am obli

to ask the aid of persons of energy public spirit in the various section our State in gathering and forward to me specimens of soil for this purp I want a fair specimen of soil i each county north of the base line do not want soils selected for their traordinary properties, but only a sp men which shall fairly represent average soil of any given county or It is very easy to select which will misrepresent the ave quality of soil in a district, but selection will be of very little val

The persons forwarding specin are held responsible that the soil fa represents the prevailing soil of county or district.

Very Singular.

Kalkaska

"It's berry singular," remarked Uncle Joe Johnson, as he laid down the morning paper and reflectively surveyed the toes of his list slippers, as they re posed on the guard-bar of the cylin-"It's berry singlar dat ef a der stove. man lives to be ober fifty, an' cumilates stamps an' dies gen'ally admired an' spected, dat one-half ob his survivin 'frends is a'most sartain to prove' in de courts dat he was of unsoun. a hundred y'ars ole in de poor-house, an' dey is al'ays senserbul to de las'!" and Uncle Joe shook his head solemnly, investigated

THE FARM.

Hop Culture in England.

A London Agricultural paper says the English hop planters are somewhat discouraged and demoralized. Not only have many lost money in 1878, but the year 1877 was by no means profitable to hop planters generally. Taking the two years together, a good deal of money has been lost; but during the preceding seven years large sums were made in all the hop growing districts of the United Kingdom. This, however is forgotton, while the present time of loss alone is fresh in the mind. During the prosperous season of 1875 and 1876 the English hop planters, like their American cousins, were generally in a state of speculative excitement, and planted hops somewhat recklessly, and without much regard to the suitability of the soil. There was a great demand for hop ums amounting to two years' rent were besieged by applications for farms likely to be supplied by applications for farms see possessing a spavin or ringbone farms in those halcyon days. Premiof Middle and East Kent. Upon most large estates rents were raised from twenty to thirty-five per cent. Landlords and tenants alike forgot the terrible risky nature of hop cultivation, and the bitter lessons that were learned about the year 1860, and frequently before the annals of the past. acreage of hop land was increased to 72,000 acres, and manures, especially stimulating artificial manures, were applied to a lavish extent. A reaction was thus inevitable, and now that it has come an attempt is being made by many of the planters to shift their application. A sweating-blister should government in the form of protection of the spavin, and well hand-rubbed or the levying of customs duties on into the surface of the skin immediburdens, and to get help through the foreign hops.

English hop growers assert that if the crops of 1877 and 1878 had been of good quality, they would have held their own against foreign competition. considerable irritation is produced on the surface of the skin. Then the use of the blister should be omitted for their own against foreign competition. At this moment there is actually a scarcity of fine hops in England, though the world too has the privilege of sending consignments duty free. Bright, well grown hops from the best districts are worth from 200 to 300 per cent. more than common, badly grown and badly managed samples. English planters have reduced the wages of their laborers from 7½ to 10 per cent. causing unfortunate labor disputes in some sections, though acquiesced in by others. The high rents now demanded by the landlords for hop land will need reducing. Much good hop land is now rented at \$30 per annum for each acre; adding to this a labor bill, exclusive of bran and oats, with half a pint of hop picking, averaging \$70 per acre, and it will be seen that the prevailing low prices for hops admit of but small margin to the English hop-grower, although his home market for products is the best in the world.

Merinos for Mutton.

It is often supposed and sometimes asserted in the public prints that Merino sheep are profitable only when raised exclusively for wool. F. D. H., of Lenawee county, writes to a contemporary in refutation of this fallacy as follows: In this locality, the demand for Merino wethers for fattening purposes has been in excess of the sup- to a conclusion we quote the following bly, and they have commanded prices beyond all others. Heavy shearing ewes have been largely sought for durbers way Spruce. The writer says: The Norway Spruce is one of the most poping the past fall, and large numbers ular, if not one of the most beautiful have been bought from this and adjoin- and hardy of evergreens. If it were ing counties that have been taken South and West. I have purchased convinced it would command a higher sheep for fattening for the past ten respect during its old age. The desire years, and would choose year-old Merino wether to any half or about their homes to see them grow as full-blood Cotswold to be found here, fast as possible and their distrust of let the age be what it may. And that is the opinion of nearly all here, save ural. Anything that retards growth a few who confine their sheep to low, moist lands. In a lot of six hundred, long to wait for results that, at best, bought three years ago, and fed near are not to be counted upon positively me, one-third of which were Cotswolds, as they believe. Therein lies the misor half-bloods, the buyer of two car- take. The results may be confidently loads took for his first choice a carload of all Merinos, weighing one hundred from our own experience. The Norand twenty-eight pounds. They went | way Spruce, if left to itself while young, to market about December 10th, hav- especially if not well planted, attains ing been fed corn, straw and cornstalks, with little hay, not to exceed thirty days. I can cite several flocks lose their foliage and the conical symof Merinos, mainly three years old, which went into the yards weighing its first charm, is marred. If when one hundred pounds, that have sheared from seven to nine pounds fleeces, and buds had once been pinched out-or will continue to do so if the market what is the same thing, the tips of all will not warrant a sale for fat sheep.
Our Merinos go to market at the ages

what is the branches except the lower and lower-most ones had been cut off—and the of two and three years mainly.

If well kept until five years old they should leave the pastures weighing at least one hundred and ten pounds, and and a vigor would have been imparted until they reach that age they will not to them that would be retained as long only give the heavy fleeces, but in-crease in worth yearly. A large pro-bust or as long as the tree maintained portion of our feeding sheep are taken a healthy existence. The impression, to Ohio, Western and Central New which until of late years has been quite York, and do not go to market as Michigan stock.

If G. G. will tell us how and where we can realize \$15 per head for Cotswolds of one to one and a half years old, he may tempt us to give them another trial, but the verdict is here almost universally for the Merino that gives a fleece of seven to ten pounds and mutton sufficiently good for those 'out West" to eat.

Bone Spavin.

In reply to questions as to the nature of bone spavin and the best methods of treating it, Dr. E. S. Smith, the veterinary editor of the World, replies as follows: A bone spavin causes lameness in consequence of the tumefied state of the ligamentary and subcellular tissues around the tarsus or min' and dat he wasn't fit, in his hock-joint. Hard work and abuse later years, to plan out a v'y'ge for a must necessarily tend to inflame the mudscow. But you'll fin' de papers full inter articular cartilages between the of stories ob ole fellers dat die 'bout small bones of the hock, and to this inflamed, bruised state of the parts may be both accurately and correctly attributed the primary stage of spavin. and worthless sires, and permitting the alone, and now the manufacturers are untoot-ored mind."

dam while she is in harness, are the chief causes of producing spavins. An exchange says: The disposition made of the cider crop is perplexing But whatever the primary cause may be. I believe anchylosis to be the only cure for a spavin of any size. This term denotes an intimate union of the heads of two or more bones, which were, in a normal condition, naturally connected by a movable kind of joint. With the object of making a cure the animal should be released totally from all work, and if the weather permits, turned out to grass. Many veterinary surgeons indulge in the idea that nothing short of the active use of the firing-iron and severe blistering can be of benefit in treating a spavin or ringbone; yet my very extensive practical live stock has taught me that the practice of firing and blistering either a bone-spavin or a ringbone is not only ses possessing a spavin or ringbone having been occasionally restored after and methodical mode of treatment.

twice daily, for half an hour each time, water; apply with a sponge, as hot as the animal can bear it without causing distress. The ley should be kept | year. at the same temperature during each fomentation. All ley material should be carefully but thoroughly removed from the surface of the skin when drying the parts immediately after each be applied every night over the region ately after the parts have been fomented and dried, as above described, until three days, and applied again in the same way. The blister is composed of one ounce each of tincture of cantharides, oils of turpentine, origanum and spike, two drachms of finely pulverized corrosive sublimate, three ounces each of raw linseed oil, camphorated oil, tincture opii and one pint of alcohol. Incorporate these well together in a bottle, and the blister is ready for use. The fomentations must be perseveringly applied twice daily as above described during the blistering and for several days after the use of the blister is wholly discontinued. Feed your horse on mash food, which should conbruised flaxseed meal added, properly seasoned with salt, morning and even Make each mash with cold wa The remainder of the food should be grass. This treatment will be found as efficacious as any, and will leave no scar or blemish behind it, providing it is used according to the directions given.

The Norway Spruce.

The season for planting and trans planting trees is approaching, and many are debating what sort of shade or or namental tree they can add to their door yards. By way of helping them on the part of those who plant tree its fullest beauty in ten years. Afterfirst set in its permanent abode the same course had been pursued the second Spring, growth would have been confined mainly to the lower branches, general, that evergreens (hardy coniferous evergreens, at last) were never to be cut back, is still a conviction in the minds of many; and it is one that deprives them of the very best means both of adding to the attractiveness of their evergreens and of preserving that attraction unimpaired to a good old age. For the purpose of inducing this strong development of the bottom branches, and at the same time a more compact habit throughout, instead of cutting off or "back" the branches, we have for several years past merely twisted out of the verticle of buds which terminates them. These buds begin to form as soon as the spring growth is completed, and they may be removed in the following fall, winter, or early the next spring. Thus only the terminal growth which would have been made is prevented, and the

same object is accomplished. A Little More Cider.

The old Bay State seems to be suffering from a deluge of cider. It is estimated that not less than 150,000 as if there were some things in this It is claimed by many that breeding barrels of that beverage have been world which modern science has not yet from old, broken-down, spavined mares made in the western half of the State quotation, "Lo, the poor Indian, who

foal to run by the side of its mother or debating what they shall do with made of the cider crop is perplexing the farmers as well as the temperar people. Some of the larger make such as John D. Miller, of Colerain have stored from 1000 to 1200 barre and in general in the smaller towns is put into the cellar. They tell of one "moderate drinker" at Hatfield who put up 14 barrels and tapped the last within three months. Vinegar-mak-ing is also a great industry with some, particularly the Smiths of Smith's Ferry, who make hundreds of barrels and supply pretty nearly every gro-ceryman in the city. It goes without saying that this cider vinegar is infinitely superior to the acid concoctions experience in veterinary treatment of gotten up in New York. The price is generally double that of cider. Others have sold the crop about as fast as turned out, though it has been with as a rule useless, but cruel and barbarous, and not one case out of every thousand thus operated on gives any good results. The simple fact of horhas been kept constantly full, has sold Landlords and tenant farmers outbid each other for lots of known reputation, and as much as \$1400 per acre to the application of the hot iron and selection, and as much as \$1400 per acre to the application of the hot iron and selection and selection are the application of the hot iron and selection and selection are the application of the hot iron and selection and bottlers. The arrangement by which the cider is stored in a large the whole length of the Connecticut tion, and as much as \$1400 per acre was given for hop land in the best parts of Middle and Fact Kent Und mathedical and mathedical mathedical and mathedical mathedic rels, is a great labor-saver, and is usually adopted by all the large makers, as froment the spavin developed on the arsus or hock-joint of your mare N. T. Smith, of West Springfield. The tarsus or hock-joint of your mare retail price has varied from \$1.50 to \$2.50 a barrel, the latter being about the figure now. An extensive business in bottling is carried on by M. D. Sleeper, who handles 1200 barrels a

Cultivation of Flax.

The cultivation of flax is not very extensive in Michigan, but properly conducted it is a paying industry, and must in the near future receive more attention from farmers than it ever has yet. A correspondent of the Indiana Farmer gives the following information as to the best methods of raising this crop: Flax, in Indiana and many other parts of the West, is an important crop. It is grown principally for the seed, though the lint is generally saved, mills being erected for that purpose. The time of sowing is between that of oats and the planting of corn. The ground should be well pulverized and the seed lightly harrowed, rolled or brushed in. Thirty-five pounds to the acre is a proper quantity to sow. It matures a little earlier than oats, and should be cut when one-half or two-thirds of the balls are brown. A common way of cutting here is with a grain cradle, cutting back and forth on one side, thus throwing two swaths together. They are allowed to lie a week or more, and when dry, hauled to a convenient place, where a ring is made by scraping off the top soil, and the seed is tramped off with horses, or better still, with a twohorse roller. A common yield is from eight to ten bushels per acre. The straw usually brings from four to six dollars per ton for the lint; but if cut before it gets too ripe and taken up without rain, it is worth more than that price for feeding to stock. My own experience is that it is nearly or quite equal in value to timothy hay for feeding to sheep and cattle. Last harvest we cut our flax in a continuous swath thin enough to dry out in two days' time. We hauled it to the barn and tramped it on the floor, and when rain threatened we hauled the balance and mowed it over the floor and tramped it at leisure. We are now feeding the straw to cattle in connection with hay, and they eat the one as eagerly as the other. But the best of the feed is the chaff. Milk cows relish it alone, and mixed with corn meal is servery excellent food. Two good crops of flax seed cannot be grown from the same land in closer succession than eight or ten years; but it is not considered very exhaustive of the elements of the soil necessary to feed other crops; and a flax-stubble is considered second only to a clover-sod for a wheat crop.

Wife.

What do you think the beautiful word "wife" comes from? It is the word in which the English and Latin language conquered the French and Greek. I hope the French will some day get a word for it instead of that dreadful word femme. But what do you think it comes from? The great value of Saxon words is that they mean something. Wife means "weaver." You must either be housewives or housemoths; remember that. In the deep sense, you must either weave men's fortunes or embroider them, or feed upon and bring them to decay Wherever a true wife comes, home always around her. The stars may over her head, the glow-worm in t night-cold grass may be the fire at h foot; but home is where she is; and fo a noble woman it stretches far aroun her, better than houses ceiled wit cedar and painted with vermillion shedding its quiet light far for thos who else are homeless. This I believ to be the woman's true place an power.—Ruskin.

Farmers often wish to find the tents or capacity of a cistern by s method easier than measuring the water it will hold. This may be done by a little figuring thus: A cubic foo of water is 7½ gallons. If the eistern is a round one, mutiply the diame in feet by itself and then by .7854, c ting off the last four figures; this give the square feet of the surface of cistern; multiply this by the numb of feet in depth, and the result is cul feet. An example is given as follow A round cistern is 10 feet in diamet and 10 feet deep; 10 multiplied by itse is 100; multiplied by .7854 and cuttin off the last four figures gives 78 54-1 square feet of surface; this multiplied by 10 (the depth)is 785 4-10 cubic feet this multiplied by 7½ gives 5,690 which is the contents in gallens is equal to 190 barrels nearly.

SATURDAY, Feb. 14, 1879.

REPUBLICAN STATE CONVENTION. A Republican State Convention to nominate one James V. Cambell, and two Regents of the State University in place of Claudius B. Grant and Charles Rynd, will be held at the Opera House in the city of LANSING, THURSDAY, MARCH 6, 1879, at 12 o'clock

In accordance with a resolution adopted at Grand Rapids, May 10, 1876, every county is entitled to one delegate for each 500 of the total vote cast for Governor at the last State election (in 1878) and one additional delegate for every fraction of 300 votes, but each organized county will be entitled to one del-

Under a resolution of 1858 no delegate will be en witled to a seat who does not reside in the county he proposes to represent.

Z. CHANDLER, Chalrman. Q. W. PARTRIDGE, Secretary. Dated, Detroit, February 11, 1879.

THE fact that the Democrats are considering, in all its bearings, Moses' attempt to make a kite tail of them shows how hopeless they consider their situation.

We publish in another column a letter from Mr. Watson Snyder on the subject of Local Option. There are two sides to the question, and we would be glad to print a communication favoring the other side.

On Thursday evening last the Republican caucus nominated, and thereby assured the election of, Zachariah Chandler to fill the vacancy in the United States Senate, caused by the resignation of Senator Christiancy.

the Senate to oppose his solid front to the Solid South; and now he supports that Hamburg murderer, Ku-Klux, red-handed butcher, Butler! When Don Cameron that end. goes back on the Republican party, who can be relied on?

Suppose that the Greenbackers should elect two Regents of the University, and then suppose that the question of a professor of political economy should come up; wouldn't Regents in pressing Moses W. Field's name for the place? And think how much of a stir the little man would make when he got up before his class to say: "Gentlemen, Adam Smith, McCollough, Mill, yes, even Carey, were all wrong. Fiat money is the true measure of everything, and I am the apostle of fiat money."

THE preliminary statement of that singularly efficient officer, Insurance Commissioner Row (who, by the way, is a graduate of the State Normal School), shows an increased surplus over capital as compared with 1877, and not a single impaired capital nong the companies represented in Michi-

The returns for 1878 show that the panies made a small net gain during the ye , while they worked at a loss during The change from loss to gain is the result of extra caution as to risks. There are 105 fire insurance companies doing business in this State.

glad to learn that a bill containing the following provisions has passed both House and Senate and now awaits only the President's signature to make it a law:

"Any woman who shall have been a mem ber of the highest court of any State or Territory, or of the Supreme Court of the District of Columbia, for the space of three years, and shall have maintained a good standing before such court, and who be a person of good moral character, shall on motion and the production of such record be admitted to practice before the Su preme Court of the United States."

THE indications of a split in the Democratic party are every day becoming more plain. In a recent caucus of the Demoerats of the House, Gen. Ewing proposed as a party measure that the national bank notes be withdrawn and legal tenders issued in place of them. Mr. Abram Hewitt was on his feet immediately to tell Gen. Ewing that Eastern Democrats did not look with favor on measures of that kind, and that if such a movement were forced on the Democratic party, he (Hewitt) would cease to be a Democrat. In the face of such opposition the motion was withdrawn, but the Democratic party is to-day fast drifting towards the shoals of the Ohio idea, and the best thing that sensible men can do is to leave the ship.

THE Rev. Geo. Duffield, D. D., belongs to a family of State reputation, and he himself has the reputation of being one of the leading ministers in the State. With his schoolboy. He ascribes his freedom, as he own and his family's reputation to uphold ought, to Giles' Linament Iodide Ammonia it is well nigh inconceivable how he could be induced to break his sacred word of honor and to cast an unlawful vote at the meeting of the Board of Regents. That he did so act the following telegrams prove:

HOUGHTON, Mich., Jan. 31, 1879. Geo Duffleld, Lansing, Mich.: Will you pair with me on all questisns re-lating to Rose, Douglas, and University suits at coming meeting? Wife sick; would stay home if possible. C. B. Graym

To this Regent Duffield unequivocally re-

C. B. Grant, Houghton, Mich.: Yez, pair with you on Rose-Douglas ques on as desired. Geo. DUFEIELD.

AT the last meeting of the Regents of the

mie, Rynd, Duffield and Maltz voting for,

Regents S. S. Walker and Cutcheon voting against, and Regents E. C. Walker and Grant being kept at home by illness. Had the Board delayed action until Regent E. C. Walker was able to meet with them and had Regent Duffield kept the pair made by him and Regent Grant the vote would have been a tie, and no re-instatement could have Justice of the Supreme Court in place of the Hon. been made. The Board of Regents is so small and is supposed to be so honorable a body that the people of the State have a right to expect that its proceedings shall be conducted in a gentlemanly, not to say an honest manner. Such hope, however, is clearly unfounded. By their vote the Regents have placed in the faculty or Michigan University a man whom the courts have pronounced guilty of stealing from the institution that employed him; they have thrown away \$5,000 which the courts have adjudged them entitled to; and, because they have acted from prejudice rather than from judgment, they have done all in their power to injure the fair fame of the Uni-

> THE true doctrine of loyalty to party is, as it seems to us, ably set forth in the following extract from the last number of the Harper's Weekly:

In our system of government, where results are to be obtained only through party agency, patriotic men will hold their party simply for what it is—a means to an end; but they will not abandon the means so long as, with all its imperfections, it seems to them better than any other. There are times, of course, when an honest man will vote against his party, but he will not abandon his party because some part of it honors men whom he does not, or because it may sometimes pass measures that he does not approve, or fail to support those that he desires. When, however, such men control When, however, such men control absolutely, and when such measures are the If we mistake not the Republicans of Pennsylvania sent Don Cameron back to We recognize the Republican reaction, but we do not yield to it. We do not "acquiesce in the propriety or necessity of running the Republican party on traditions, or even on rejected reforms," but in adjusting it to real and vital issues, and we shall labor to

PATRONAGE.

The Argus, speaking of the New York Custom House appointments, says:

Although Mr. Hayes owes his nomination to the Conkling delegation which gave him a majority in convention, he seems blind to the people of Michigan support those two the rule of courtesy which the senator is entitled to, and substantially ignores him in of a the distribution of federal patronage. Among the first acts of his administration was the decapitation of his friends, which, following upon the heels of the Cincinnatti convention, and the electoral commission bill, conceived by Conkling, was a return hardly to be expected from one for whom the senator had done so much service.

The idea, which the Argus supports, that the President of the United States ought to use the machinery of government to promote the political fortunes of this or that man lies at the bottom of all that is bad in American politics. Doubtless it would be a touching exhibition of courtesy for President Haves to allow Conkling his own sweet will in the selection of such officials as he saw fit, but we trust it is only necessary for us to remind the Argus that the last Republican platform is supposed to be founded upon the principles that offices are not to be disposed of for value received. Conse quently we should do Mr. Conkling the justice to suppose that if he influenced the delegation for Hayes, he did so because he THE friends of woman's rights will be considered Hayes, next to himself, the best I U M IS E R. I A T H. man for the place, and not because he expected anything in return.

> Commission after commission, of the most unprejudiced men that could be found, examined the affairs of the New York Cus tom House only to report gross bribery of officials, sinecure positions, neglect of duty in the interest of Seuator Conkling, all of which abuses cost the people many hundred thousands of dollars annually. When President Hayes made a change in the custom houses of New York and Boston, he did so not in the interest of any politicians, but in the interest of sound business management, that is, in the interest of the people who have to make up in taxes what the custom houses do not collect.

> President Hayes could not keep the "rule of courtesy" which the Argus talks about, without committing as great a wrong as the cashier who speculates with the bank's money commits. The lesson that politicians should be made to learn is that government officials belong not to the train of a State politician, but to the business force of the government; and we would suppose that the Argus, from its position in the minority, would be the foremost to teach such les-

> WALLACK'S ORCHESTRA. - The orchestra of Wallack's Theatre, New York, is famous for its extraordinary precision. This is due entirely to Thomas Baker, an Englishman, who has conducted it for years. Baker used to suffer terribly from rheumaism, but now is as suple and nimble as a Sold by all druggists. Send for pamphet.

The Cooley Creamer.

ED. COMMERCIAL. - Having as I think ful-Propose not simply to keep up experimenting with in October last, I desire to call the attention of all who are interested in the dairy business to the great utility of this the age—destined to have a place ity of this the age—destined to have a place in every well regulated dairy in the country. The fact that cream may be raised in twelve hours, all of it, and the very little space occupied in setting the milk, also that more butter and a very much better quality is produced, are facts which the public at large are interested in, and rightly so. The constant labor arising from setting milk in pans is all saved. This of itself ought to recommend it to the attention of every farmer's wife in the country. I would be slad to awaken an the country. I would be glad to awaken an interest in this invention until every houseold in the land may reap the benefit of this wonderful labor-saving process of cream raising and butter making. Very telling facts are these, in confirmation of what is claimed for this invention. The HIGGINS SWEETSTAKES PREMIUM OF \$250.00 given for the best butter made by any fac-tory or dairy in the United States, was awarded to Hiram Smith of Sheboygan, at the International Dairy Fair, Dec. 18, 1878, for butter made by the Cooley process. There were eighty packages to contend with, and Mr. Smith felt the test to be a severe one. He asserts that it was made strictly after the Cooley system,—in no case the milk standing longer than between milkings,—and he adds, "In no case would I go back to the old system of butter-making; I could not afford the increased labor, and accept the decreased price that common dairy butter sells for." At the same Fair, John S. Murray, Delhi, N. Y, was awarded the First Premium of \$125.00 for the best butter made in New York State. This butter was also by made the Cooley process. Samples of the butter made in June were on exhibition in fine condition, showing there is no question as to its keeping qualities. The Cooley Creamer, will pay for itself every sixty day, summer and win-ter, F. S. FINLEY, ter,

THE GREATEST REMEDY KNOWN.

DR. KING'S NEW DISCOVERY for Consumption is certainly the greatest medical remedy ever placed within the reach of suffering humsnity. Thousands of once hopeless This Indian is, or was, one of name who stood-off eight companies of troops for this wonderful Discovery, to which they owe their lives. Not only does it positively cure Consumption, but Coughs, Colds, Asthma, Bronchitis, Hay Fever, Hoarseness and all effections of the Throt, Chest and I was destroyed by fire last Monday: Lungs yield at once to its wonderful curative powers as is by magic. We do not ask you to buy until you know what you are getting. We therefore earnestly request that you call on your Druggist Frank Smith and a trial bottle free of charge, which will convince the most skeptical of its wonder-ful merits, and show you what a regular one dollar size bottle will do. For sale by Frank Smith.

THE CROWNING DISCOVERY.

All the "phones" of this phonetic age are surpassed in practical benefit to mankind, by the discovery of Allan's Anti-Fat, the great and only known remedy for obesity, or corpulency. It produces no weakness or other unpleasant or injurious effect, its action being simply confined to regulating di-gestion, and preventing an undue assimila-tion of the carbonaceous, or flesh-producing elements of the food. Sold by druggists.

Ellsworth, Kan., July 13th, 1878.
Botanic Medicine Co., Buffalo, N. Y.
Gentlemen—Allan's Anti-Fat reduced me seven pounds in one week.

Yours respectfully, MRS. TAYLOR.

From mystery on to mystery My way has been; yet as I near The eternal shore, against the sky These crags of truth stand sharp and clear.

Where'er its hidden fountain be, Time is a many-colored jet Of good and evil, light and shade, And we evoke the things we get.

We cannot eramp ourselves unharmed In bonds of iron and of creeds; The rights that rightfully belong To man, are measured by his deeds.

-Alice Cary.

COUTHOUI READINGS.

Miss Couthoui has so far recovered from hor illness as to be able to appear in public. During the last week in January she read at Aurora, Ill., and the News of that city speaks as follows of her success:

Her pleasing manner and prompt answer o encores, makes her a favorite wherever she goes. She might appear here a dozen times in a season and would be greeted with a full house every time. Her programme is always so varied that she really gives as good an entertainment as a dozen people

Miss Couthoui also appeared in Chicago, Feb. 6 She comes to Michigan expressly to read in Ypsilanti, and the long-promised entertainment will take place at Light Guard Hall, Feb. 10. The talent which Miss Cough Remedy show their readiness to have the virtue of their medicine tested, for Couthoui possesses is already well known, they authorize all their agents in this County to refund the full price paid for it, when by using one-fourth the contents of a 50c. bottle, it does not prove all that is recomended for it in all diseases of the throat Boston, and one of the leading clergymen

Boston, Jan. 17, 1879. I was delighted with her readings; and I know of no other lady who has such natural genius for the art. She excels all others I have been permitted by my engagements to hear, and cannot but satisfy the demands Rev. George H. Thayer, an old citizen of this vicinity known to everyone as a most influential citizen, and Christian most influential citizen, and christian citizen.

by a gentleman in town and was handed us for publication. The writer is so well A large proportion of the American people are to-day dying from the effects of Dyspepsia or disordered liver. The result although for prudential reasons no name is known in Ypsilanti that his many friends signed. The scalp is now in our possession, and it is, we should judge, a very fine

LOWER BRULE AGENCY, D. T., ? February 2, 1879.

dvice y one Your Your Your f hot.

My Dear —:—I send you by this mail the scalp of a Cheyenne Indian who was killed in the Fort Robinson fight. Wethermen who were on the battle ground the next day, and all say that nearly every Indian was scalped. The man who gave me this one saw the Indian killed. He, in company with a soldier, were hunting the Indians on a hill-side, the soldier being a few rods ahead of him, and the Indian seeing the soldier alone, as he supprosed, sprang upon him with a knife; the soldier fired and missed and as the Indian came within reach, killed him with his clubbed carbine, and taking the Indian's knife lifted his hair; but the officers made such a fuss that he had to get rid of it, so he handed it stands. to the party that gave it to me. You can show it to Jim. McKinstry—perhaps he would like to show it in his store for a few days as it is a historic relic—for the fight at Robinson settled the Indian question as far as the Cheyenne nation are concerned there is not a corporal's guard left of them. This Indian is, or was, one of nine who store was destroyed by fire last Monday; nothing was saved. I am very well indeed, and we are having splendid weather. Please send me a paper occasionally, as I have not seen one lately.

COUNCIL PROCEEDINGS.

SPECIAL MEETING.

FRIDAY BVE., Jan. 31, 1879.

Roll called. Present Alds. Kishlar, Fraser, Oremer, Fellmor, Smith and Hutchinson.

YPSILANTI, FEB. 15, 1879.

The new Assembly Chamber at Albany has such poor acoustic qualities that a resolution to buy one hundred and twenty-seven ear trumpets was gravely debated the other day. Moreover it is going to cost \$75,000 a year to keep the new capitol in order, and nobody knows how much to pay the reform Legislatures who try to cut down the expense.

The Democracy through the upper house of the Virginia Legislature has made itself ridiculous again. That august body has adopted by a unani mous vote a series of nullification resolutions. They deny the right of the general government to protect a citizen in life, liberty or property, or the exercise of rights where the State claims jurisdiction; declare the legislation which has grown out of the constitutional amendments to be null and woid; deny the right of the general government to enforce the decisions of its own judiciary where the State interposes its veto, etc.

Pelton testifies before the congress sional committee that when he told Tilden about his efforts to buy a returning board for \$60,000 or \$80,000, that the old gentleman was "much annoyed." In fact his annoyance at this corruption on the part of his bosom friend reached such an extraordinary pitch that he took Pelton right into his own household and kept him there as a trusted and confidential adviser. It is such unparalleled outbursts of virtuous indignation as this which wipes out all suspicions as to the old patriot's complicity in the cipher correspond-

The Potter committee has sent a subcommittee to New York to take the evidence of Mr. Tilden. When that is done, there will be at least a beginning made in laying bare the mystery of the Not that the defeated candidate will be likely to cast much light on the efforts made to steal the Presidency, on his behalf, but that the extent of his ignorance of the intrigues which went on under his nose will indicate the extent of the knowledge which is to be sought for elsewhere. Mentally and physycally, Mr. Tilden is likely to present a somewhat suggestive specta-ele in the witness-box. The sub-committee consists of three Democrats and one Republican.

Governor Drew, of Florida, issued a certificate of election to the Democratic candidate for Congress from Florida, although the Supreme Court of the State ordered a recount of the votessuch abominable frauds were perpetrated—and the Republican candidate, Beebe, was declared elected. Hull, the Democratic nominee, will be tried by the United States Court for conspiracy to defraud, and it is not probable will ever take his seat in Congress. This is one of the States in which the cipher telegrams disclosed the corruption of the New York "coparceners," and it seems as though the example set by "Moses" and others had not only been copied and revised, but enlarged upon in a manner showing that the natives of Florida are adepts in political knavery.

A Representative Michigan Man.

The Elmira, New York, Husband-man of January 8, publishes a good portrait of Hon. Alonzo Sessions, of Michigan, with a brief history of his career. Forty-five years ago, says the Mr. Sessions left Onondaga county, New York, and bought land in Michigan, then almost a wilderness, where he has carved out a home and foftune for himself by enterprise and intelligent labor, and "he is now tilling nearly 1,000 acres of rich lands." His neighbors recognized his worth, and made him Supervisor, then member of the Legislature, then Lieutenant Governor. The Husbandman pays Mr. Sessions' character the following trib-

"The fact is, Mr. Sessions has been sought to fill public offices and has never planned preferment for himself. He therefore belongs to the class of citizens that the Husbandman has been correlantly commending during all its We have no high regard for the professional office-seeker, but when, as in the case of Mr. Sessions, the office seeks the man, in our judgment high honor is conferred, especially when the officer proves his capability and fitness for the place. Though a plain practical farmer, as presiding officer of the Senate of his State he won high encomiums from intelligent observers who declared that the Senate had never had a more impartial, prompt and resolute President. With such men holding public trusts there is

Mr. Sessions may truthfully be called an obstinate man. He is vigorous in thought and clear in his conceptions of right, and when he has reached a conclusion, which is done carefully, yet quickly, he has reached it to stand by it. He never thinks of making his opinions conform to political considerations, but with a consciousness of right he is ready to combat all forms of prejudice, to meet all the darts of the demagogues, and to defend, singlehanded if necessary, the truth of his convictions. Such men are seldom radically wrong. Their intuitive ability and unyielding honesty enable them to

reach safe and wise conclusions."

"The farmers of Michigan are to be congratulated in having so worthy a representative in the Lieutenant Governor's chair, recently elected for the second time. They have reason, too, to feel proud of the position which agriculture holds in their State, for in no farmers' institutes are pleasing eviden- about the cylinder.

ees of the spirit of progress which pervades their great class in that prosperous commonwealth."

Financial Danger of a Solid

South. If any man in the North-no matter what political party he belongs—reards with indifference the accession of the Democratic party to power in both branches of Congress, or contemplates without anxiety the possible triumph of the Solid South in all departments of the Government, he must be a careless student of what is now transpiring south of Mason and Dixon's

It is not necessary to recite the enornous wrongs the ex-Confederates are inflicting upon the freedmen, nor to refer to the wholesale frauds upon the ballot by which the North comes in for a share of the injustice to convince any thoughtful man that the path to great if not ruinous danger lies along the way of a victorious South—a triumphant Confederate Democracy. Can any Northern Democrat reasonably claim that the Confederate management of national affairs would be any better than the Confederate management of the separate Southern States? If Confederate Democrats care nothing about the financial honor and integrity of their several common-wealths, how much would they care for the national honor and integrity? If they are ruining and disgracing the one, how long would it be, were they in full power, before they would ruin and disgrace the other?

Rampart or covert repudiation characterizes nearly all the Southern States Disgraced Virginia stands prominently forth upon the black list, though no one of her apologists will claim that she is not able to pay her just obligations. Tennessee has long been in the habit of boasting of her mmense inherent wealth, but now she is oozing out of sight in the mire of repudiation. The other day her Demcratic Assembly voted down a proposition to compromise with her creditors by paying fifty cents on the dollar. In Mississippi, Arkansas, Alabama and other Southern States the same disgraceful condition of things prevails to a gaeater or less degree. In Louisiana Democratic rule has less speedily ex-but other buyers beside English take hausted the balance a Republican State pudiation cry is heard there also more loudly than ever before. The revenues, crease every year of the area under which were ample under Kellogg to meet expenditures and leave a surplus, are now so low that the interest on an ebb that the New Orleans banks refuse a temporary loan to tide over the emergency. Could anything be more humiliating? The old Democratic party so ruined the national credit that Buchanan's Administration had to beg for funds at an enormous rate of inter But the new Democratic partythe Confederacy of to-day—has so utterly destroyed the credit of many of the Southern States that they can't obtain a penny in any money market of the world.

Is this the party to assume undisputed conrol of every department of the National government? Are these Southern repudiators, and bankrupters of States, and their ilk the men into whose hands the mighty financial interests of this country should be placed? Are the repudiating Legislatures of Virginia, Tennessee, Louisiana and the rest the proper bodies to instruct the Senators and Representatives of a Albany Journal.

Ancient Shoes.

Recent discoveries have shown that the modern form of shoes is the same which was in use in Upper Egypt ages and ages ago. The pictures found in tombs in Upper Egypt represent people wearing shoes exactly like ours. It is, nevertheless, certain that the form of these shoes was unknown generally in the East, for chroniclers mention that everybody in the East, in Sparta, and at Athens, went barefooted. Sandals came very slowly into use, for they were extremely inconvenient, and Athenians commonly preferred to go barefooted. In Rome, too, even senators long went barefooted; Cato, of Utica, never walked otherwise than barefooted. Shoes were so rare in France, in the ninth century, that they were among the presents sovereigns made to each other; for example, Solomon III., sovereign of Brittany, charged the ambassadors he sent to Rome to present the Pope, in his name, a golden statue, a mule, saddled and bridled, 30 shirts, 30 pieces of cloth, 30 deer skins, and 30 pairs of shoes for his servants. The caprices of Fashion soon began to mold the form of shoes, and the stranglittle danger of political jobbery and corruption. They make no compromises with wrong.

est forms were adopted. Medæval chronicles are full of invectives against the shoes, a la poulaine, which were in great vogne in the lath control. est forms were adopted. Medæval The toe of these shoes was pointed up ward like the prow (poulaine) of a galley; the heel was armed with a spur. A Royal ordinance of 1367 interdicted these shoes in France. They, nevertheless, were still worn by some persons at the court of Francis I. Shoes with excessively broad toes drove these shoes out of fashion. In 1422 boots made their first appearance. Mezeray mentions that Charles VII. was so poor on his accession to the throne that no shoemaker would sell him a pair of boots on credit. The forms of shoes and boots have changed repeatedly and annually changed.

Among recent labor-saving inventions is that of a potato digger. It is a sort of two-horse cart, under which is a sort of plow which runs under the potato hills, and is followed by a revolving toothed cylinder which sepother is it more highly esteemed, or arates the potatoes from the loose soil.

The World's Wheat Crop.

The average wheat crop of the world

From The American Cultivator:

is about 1,600,000,000 bushels, of which the United States raises nearly onequarter with a surplus for export of at east 110,000,000 bushels. France is the next largest producer of wheat, with an average annual crop of 280, 000,000 bushels, although her harvests for 1878 were 55,000,000 bushels short of that quantity. The average Russia 220,000,000 bushels, of which the estimated exports are 44,000,000 bushels. Great Britian raises upwards of 100,000,000 bushels of wheat, though this is only half her annual consumption, hence she is dependent upon foreign countries for nearly 100,000,000 bushels of wheat per annum. Germany with 121,000,000 bushels, Spain with 115,000,000, Italy with 107,000,000 and Austro-Hungary with 102,000,000 bushels of wheat per annum, all excel Great Britain in quantity produced. Canada, Australia and Egypt produce nearly equal quantities of wheat, or 16,500,-000 bushels each per annum. England and France, the only countries which import wheat upon a large scale, have grown during 1878 about 150,000,-000 bushels less than they will require for consumption, while the United States and Russia are together in a position to export 154,000,000 bushels or about the quantity which the two former countries want.

The only other countries that have wheat in quantity available for export this year are Austro-Hungary, Roumania, Denmark, Canada and Austalia. The Weather was far too mild for the season in Italy, the rainfall also damaging the quantity of the wheat, hence she will have to import about 8,000,000 bushels. The Bombay roport for the East Indies indicates that the values of wheat continue too high to allow of any exportation, while in Calcutta prices are advancing. From India for the past twelve months, wheat shipments have been only one-sixth of what they were a year ago. Wheat in Egypt continues in demand at very full values, owing to a deficiency of at least one-third in the crop, thus forbidding any export the principal share. A few years ago Government left on hand and plunged the people into bankruptcy. The renow become a regular importer of cenow become a regular importer of cecrease every year of the area under wheat culture in Europe. South Australia carried off the highest prize for wheat at the Paris Exposition, and is the public bonds cannot be met. And likely to become one of the most im-the credit of the State has sunk to such portant grain-producing countries in portant grain-producing countries in the world; in fact her total area under wheat last year exceeded a million acres. To the United States, however, as the largest wheat-producing country in the world, do the hungry millions of Europeans look for the staff of life, and in the event of prosperous times abroad, that the purchasing power of the masses may be inceased, a remunerative market may be expected for our surplus farm products.

Reminiscence of Bayard Taylor.

The American Parnassus was a Bedlam in the autumn of 1850, and Bayard Taylor was the innocent cause of its madness. The Prince of Showmen had imported Jenny Lind to sing before his admiring countrymen, and, to flatter their national vanity, he offered a prize of two hundred dollars for an original exact further. All the vergifiers in iginal song for her. All the versifiers in triumphant party? The dire calamity is not yet upon the country but it is impending. Fortunately the people are warned in time. If they neglect to heed it the worst may be expected.—

Taylor came one afternoon early in Sontember and confided to me the fact theland set at once at work to immortal-Sentember and confided to me the rac that he was to be declared the winner of this perilous honor, and that he foresaw a row. "They will say it was given me because Putman, who is my publisher, is one of the committee, and because Ripley, who is my associate on the Tribune, is another." "If you think so," I answered, "withdraw your name, and put my name in place of it. You shall have the money, and I will bear the abuse." He laughed, and left me, as I thought, to do what I had suggested; but he concluded to acknowledge the authorship himself, and stand the consequences. The decision of the committee was published next day, and the indignation of the disappointed competitors was unbounded. They rushed to all the editors whom they knew, or could reach, and these sharpwitted gentlemen, having an eye for mischief as well as fun, published their prose and their verse, which ranged from an epigram up to an epic. The choice of the committee had fallen upon only two out of the whole number of manuscripts which had been sent to them, and being in some doubt as to which of the two was the most suitable for the occasion, they showed both to Jenny Lind, who chose the shortest one, as containing the feeling she wished to express in greeting to America. It happened to be the one that Bayard Taylor had written, and it was accordingly set to music by Jules Benedict, and sung by her at her first concert in have it forgotten, "Did you see the Brooklyn announcement of my lecture?"he wrote to me in November. "(Bayard Taylor, the successful competitor of the Jenny Lind prize.') Is that song to be the only thing which will save my name from oblivion?"-R. H. Stoddard in Atlantic for Feb.

> On the Cooper Lane, about a mile or so north of Stockton, Cal., there lives an industrious Italian on an even acre of ground lying in triangular shape between the road and the railroad at the crossing point. He has a wife and five children, whom he supports from the products of his garden. The little farm is planted in trees, vines, and vegetables, and is thoroughly well tilled. Occasionally he plants an early joining, which remains undisturbed until the plow of the fire protectors comes along. But this instance is a good illustration of "a little farm well tilled."

Can Honey be Used to Cure Consumption.

BY L. L. LANGSTROTH.

In the spring of 1861, my wife, being uite feeble, went East for recuperation. Instead of improving, her health rapidly failed. When she started for Oxford, in the fall, some of her friends feared that she might never reach there alive. She was very much emaciated, had constant night-sweats, a distressing cough, and the usual symptoms of a speedy decline. Anxiously studying what remedies could be used with any hope of success, the following considerations determined me to make a trial of the curative powers of pure honey

1. I had noticed that from the time of Hippocrates, who wrote more than 2,000 years ago, even down to modern writers, there was a strong and continuous testimony in favor of the virtues of honey in curing or alleviating all diseases of the breathing organs. Charles Butler, a very learned and accurate writer, in his "History of Bees," published in 1634, asserts "that it breedeth good blood, stirreth up natural heat, and prolongeth life;" referring largely to the ancients for his proofs.

Now, what logians call communis consensus humani generis, "the common agreement of the human race," on any matter fairly within the range of their observation, has always been considered as coming very near to demonstration itself.

2. About this time I received from the late Dr. J. P. Kirtland, of Cleveland, Ohio-the mention of whose name will inspire in a wide circle a deep feeling of reverential consideration—a letter informing me that one of his pupils had discovered that honey mixed with some other ingredient (honey, however, being the main thing), was a much better remedy in consumptive cases than cod-liver oil.

3. Nearly at the same time I received a printed statement of the various exhibits of bees, hives, honey, etc., made at the World's Fair at London. The name of the Countess Olga of Russia, was given as exhibiting some linden or basswood honey-"oleaginous honey," so called—with the statement that this kind of honey is in some parts of Russia and Persia in higher repute for curing consumption than cod-liver oil. Linden honey having a decided balsamic oder, as well as an oily nature may possess some peculiar curative virtues.

4. The bee is almost the only insect known to possess animal heat. To survive the winter, it must live in a colony state: for in no other way can it generate and preserve the requisite temperature. This heat, of course, comes from its food. To suppose that the Creator has not made this food specially heat-producing, would be like sup-posing that a good engineer who wants to get up most economically a given amount of steam, would prefer to use soggy wood or slaty coal. We need hardly say, therefore, that chemistry confirms the old belief that honey is a

specially heat-producing food. 5. Consumption is derived from the Latin word consumere, to waste, to burn up. The system of a consumptive person is in such a diseased state, that it fails to obtain from the food taken, sufficient nutriment and heat. It seeks, therefore, to make up the deficiency by preying upon the fatty tis-When the body becomes so emaciated that this can no longer be done, the patient dies; just as the fire goes out when the fuel is all consumed. To consuming itself, physicians have recproducing substances. But if honey "breedeth good blood and greatly stirreth up animal heat," may it not prove one of the most potent and pre remedies for consumption? A very aged man once being asked by Alexander how he had secured such a vigorous old age, replied: "By honey within and oil without"—that is by eating

honey and anointing himself with oil. Having duly weighed all the above considerations, I gained the consent of my wife to make a faithful trial of honey. It occurred to me that its efficacy could be much better tested by using it in small quantities and at very frequent intervals, than in any other way. If one wishes to keep up a uniform temperature in a room, by the use of a given amount of fuel, it cannot be done by using a large amount at once, with all the dampers open; but by gaining complete control over the combustion, so that the heat can be regularly supplied. This idea of small but oft-repeated doses is new, I think, and very important. If we should "eat honey because it is good," we should not too much," lest its too free use be followed by nausea and loathing. Acting upon my suggestions, Mrs. Langstroth took a teaspoonful of pure-honey, out of the comb, at least every hour when she was not asleep. She had not taken it long before it was evidently helping her. Her worst symptoms began gradually to disappear, and in about a year, she had regained her usual weight. Although she did not Castle garden. I have recovered this unfortunate lyric, but I shall not quote turn. This confirmed us in the belief continue to use it as frequently as at that the honey had been the chief agent in her improved health

Very far be it from me, to presumptuously assert that I have found a panacea for consumption, although in Mrs L.'s case, it proved to be so highly effi-cacious I believe that by its use Mrs. L., who had lost her mother and a sister from this disease, was able for more than ten years to ward it off. She died at last from a different disease, having enjoyed before her fatal illness better health than for some years. Taking into account the above train of facts and reasonings, I hope that any of my readers who are threatened with consumption, will give pure honey a faithful trial. If procured in the comb it should be slowly heated

Milk taken with honey often makes it more wholesome; and honey and cream would doubtless be more nutritious than honey alone. Some may prefer to follow the practice of the old manboth using the honey freely, and anointing the body with pure olive oil.

Michigan Live Stock in Europe.

The sensation of the past week among stock growers, has been the ru-mor that Great Britain was about to prohibit the importation of live stock from America, on account of some having been landed there infected with pluro-pneumonia. This report naturally created considerable aram, especially among shippers, sev ral lines of steamers having large contracts ahead for 1879, and no less than 1,500 cattle being actually on the way to England. During the summer months last year many of the large steamers of the National line were especially fitted up and wholly devoted to this business, the number of cattle shipped by a single vessel often numbering more than 400. Immediately following the rumor came the announcement that the Dominion Government had decided to prohibit the importation of live cattle from the United States for three months from February 1. This, however, is a matter of little consequence is very few cattle would have sent to the Dominion anyway, but the English prohibition was a more serious affair and if really carried into effect, would work great prejudice to cattle raisers throughout the North-

Later accounts represent the rimors as as greatly exaggerated, and say it is a scare gotten up to influence the market. English stock raisers would be glad of any prerext to shut out competition from this country, but it is by no means certain that they can influence the Government to that extent The mass of the English people are too deeply interested in the question of cheap beef to easily scared out of it by a few English producers. The Secretary of the Treasury has issued a circular to Collectors of Customs, instructing them that in no case will live animals be permitted to be shipped from their respective ports until after inspection with reference to their freedom from disease, and the issuance of a certificate showing they were in a proper condition of health. With this action Americans can afford to be satisfied and at the present writing the indications are that it wlll satisfy Great Britain also. At all events shipments are going on without interrup-The British Government has recently

adopted some important rnles relative to the importation of live stock into that country. From Germany, Holland, Belgium and France cattle can only be imported at six ports, under strict inspection, and must be slaughtered within ten days. From seven European countries, including Russia, Austria and Turkey, cattle cannot be imported at all, but from Denmark, Norway, Sweden, Spain, Portugal and the United States they are exempt from compulsory quarantine or slaughter. The obvious effect of these rules is to confine the source of supply to a few countries, at the head of which stands the United States. During the year 1877 there were imported into the United Kingdom from the United States about 300,000 cattle, 100,000 sheep, 50,000 swine, and 30,524 horses, and the imports during 1878 far exceed these numbers, though the exact figprevent the diseased system from thus ures have not yet been published. From five American ports an average ommended cod-liver oil and other heat- of 3,000 cattle a week were shipped to Europe from May 1 to September 1, and this was before the adoption of the rules restricting the importation of

The obvious inference from all this s that the shipment of live stock from this country to Great Britain will be much greater in 1879 than it has ever been before, and will form a very considerable element in the stock market. There are several considerations which grow out of this encouraging fact, and which ought not to be lost sight of by Michigan farmers who rely upon stockraising for a large part of their farm profits. Is the character of their land for grazing purposes and the nearness of the State to the seaboard such that they can reasonably hope to compete with the stock-raising States of West for this European trade? If so then, what changes in breed or in methods of feeding will produce beef cattle best suited to endure the long voyage to England and most accept able to the English palate when they get there? Michigan fruit is finding a profitable market abroad, and, with also, on the same good authority, "eat proper handling, Michigan cattle, sheep and swine will do the same.

Advice to Travellers.

It does not make the conductor any nappier to ask him the name of every

station that the train passes. By waiting until the train is fairly flying along and then spitting out the window you can ascertain whether those on the three or four seats back of you have their handkerchiefs or not.

By sitting at the end of your seat and putting your feet on the back of the one in front, near the window, you can often prevent a young miss from gushing about the scenery.

Always think to yourself that the conductor is lying, and assume an incredulous look, when in response to your request to have a seat turned (so of one), he replies that he has "lost the ture in all its branches.

If you carry no valise take along a bundle of old papers to put in the seat beside you. If any forward, unobserving person asks if the seat is occupied, a silent, stony stare out of the window will cause him to look elsewhere for accommodations.

until the wax is all melted. When cool this may be removed like a cake gar explained his ragged appearance

Queer Items.

A SMALL TREE.

In the Arctic regions are found dwarf willow trees growing, which are exactly like those we are accustomed to see shading river banks, only about the size of a large dining-plate. The largest branches are a foot long, and as large as a man's finger, and they trail on the ground. This seems very funny, but things almost as curious may sometimes be seen in our own coun-Last summer there grew at the side of a paved street in Brooklyn, a morning glory vine. You know how large and long they usually grow?well, this one was not more than three inches long, but it was determined to do its very best, and it actually managed, in spite of hard paving stones, little water and poor earth, to open a blossom to the sun. That flower was a curiosity; a poor, starved, colorless little atom of a thing, about as big as a baby's thimble.

VEGETABLE ROPE.

The ratan, of which we make the eats and backs of common chairs, is a curious plant. It grows in the tropical forests, and looks more like a rope than plant. Sometimes it is four or six hundred feet long, climbing the trees feet apart, and at every joint a bunch of feathery leaves, with thorns on their lower sides. Others have no joints at all, and leaves only at the end which is thrust up to the sunshine over the trees. Ratans are very useful in their own tropical homes, and are brought to Europe and America in great quantities to make chairs and sofas.

A VEGETABLE CISTERN.

The baobab tree, which grows in Africa, is a curious thing. The trunk is sometimes thirty feet in diameter, and its branches—which grow straight out from the trunk—are wide enough to make a comfortable bed for a man. The trunk generally becomes hollow, and they are generally used for stables, or even for people to live in. Dr. Livingstone tells of one that twenty or thirty men could lie down together in. The baobab begins to decay at the place where the larger branches spring out, and the open part works down, the bottom becoming full of water when the rain falls. At last it gets so large that it holds a good deal, and being shaded from the sun, it keeps a long time. The people who live near the tree then sell water to travelers, for water is scarce in that country. Sometimes they climb the tree and draw the water from the top of the cistern, and sometimes they bore a hole below, and draw it out.

Life of a Ticket Agent.

"I have nothing to complain of in the matter of variety. I am not only a banker of deposits but of redemption. Some days I drive a lively business in exchanging rolls of silver for banknotes. I have regular customersfamily men and housekeepers. I have often passengers who make a pretense of having no dimes so as to get change. But they can have as much silver as they want. The road has had at night in its general cash receipts a thousand dollars in dimes. That makes ten thousand pieces of silver. Then I get to know faces, and I get to observe the moods of their owners. Some mornings a man will be dreadfully impatient, and then again cool and goodhumored. Some people are always in a hurry, whether the train is near er far off. Others wont run a step to save a train, although by quickening their pace they might save it. I can generally tell if a man has had a good or a bad breakfast, or been up late or on a spree or had a tiff at home. I have found out the ladies who are and some, I am sorry to say, who are adventuresses. I sometimes hear queer conversations in the waitingroom among people who forget me. The stations are becoming more or less places of pleasant rendezvous. Someimes a man who aught to know beter will try to pass off a Canadian or British or Spanish coin, and swear he got it in change. Sometimes a man, during five-cent time, will dash down a dime and refuse change—avarice and extravagance you see. Call up again when it is not so cold and I'll philosophize for you."

Queen Victorias Literary Tastes.

Lord Beaconsfield is perhaps not aware that until he acceded to the premiership in 1868 the Queen had only read one of his novels—"Henrietta Tempel." She read all the others in the course of the three months after Mr. Disraeli had become her chief adviser; and in due time enjoyed "Lothair," though the present premier has never ranked among her favorite au-thors. For this his lordship may con-sole himself, seeing that Thackery and the late Lord Lytton are under the same ban as himself. The Queen likes Dicken's novels, one or two of George Elliot's, but chiefly Wilkie Collins' and Mr. Black's—the latter's descriptions of Scotch scenery being very dear to her. The Queen also reads and rereads Walter Scott's novels-which is more than most of her sub subjects do now, more's the pity. On the whole, though, she inclines rather toward the serious reading of history and theology, and the iibraries at all her places are richly stocked with books of chronicles and memories, though it has been noticed that she never calls for French books havthat you can occupy four seats instead ing a deep objection to French litera-

> Telegraph post-holes are now being A hole is lug by "electric powder." drilled with a crow-bar to the depth of four or five feet, and a cartridge dropped to the bottom and lighted with a match. In a few seconds a dull thud is heard, and a hole about the diameter of a flour barrel has been blown in the ground to the depth of four or five feet. All that is necessary is to raise the pole and fill in with gravel and earth and the job is complete. The same method may, of course, be applied to digging post poles of any kind.

[In the spring of 1871 Miss Annie E Hubart, a young lady just ready to enter Cornell University, was compelled to give up all her books and dreams of education and betake herself to Oconomowoc, Wisconsin, on account of failing health. It was a late season and chilly mists and the latest desired to the prophyring lakes. neatth. It was a late season and the settled down daily on the neighboring lakes. Under these disheartening circumstances the invalid penned the following beautiful lines which have been set to music and form one of the sweetest songs of the day.]

When the mists have rolled in splendor From the beauty of the hills, And the sunshine, warm and tender, Falls in kisses on the rills,
We may read Love's shining letter
In the rainbow of the spray,
We shall know each other better, When the mists have cleared away.
We shall know, as we are known,
Nevermore to walk alone, In the dawning of the morning, When the mists have rolled away.

If we err in human blindness
And forget that we are dust;
If we miss the law of kindness,
When we struggle to be just;
Snowy wings of peace shall cover
All the anguish of to-day,
When the weary watch is over,
And the mists have cleared away.
We shall know, as we are know. We shall know, as we are known, Nevermore to walk alone, In the dawning of the morning, When the mists have rolled away.

When the silver mists have veiled us, From the faces of our own,
Oft we deem their love has failed us,
And we tread our path alone;
We should see them near and truly, We should trust them day by day Neither love nor blame unduly,

If the mists were cleared away. We shall know as we are known, Nevermore to walk alone, In the dawning of the morning, When the mists have rolled away. When the mists have risen above us,

As our Father knows His own, Face to face with those that love us, We shall know as we are known;
Love beyond the orient meadows
Floats the golden fringe of day;
Heart to heart we'll bide the shadows, Till the mists have cleared away.
We shall know as we are known,
Nevermore to walk alone, Then the Day of Light is dawning, And the mists have rolled away.

HOW A WOMAN HAD HER WAY.

A STUDY OF ECONOMICS.

From the Sunday Republican. It was the last night of the year Thomas and I sat by the fire, he had been reading aloud to me, while | tious omen. darned the stockings and mended Tommy's knickerbockers.

"What a wonderful thing it will be!" I exclaimed, "and perhaps there will be some to go from here."

"Doubtless there will," asserted Thomas, as he arose to wind the clock, "but one thing is sure at the outset, Jenny, we can't go."

So there it was,—the same old story of hard times, close work to make the ends meet and denial of even inexpensive pleasures, not to mention costly I chafed under the discipline. sometimes, and somehow I felt more Must it always be taken for granted, at the outset, that I cannot go? It had that I could use by ripping apart, washseemed to me a glorious thing to be living when the nation was celebrat- piecing would do for facings, and butpositively be excluded, by poverty, from taking any share in it? It was the only chance for a lifetime, and must anted so, but he always bears the yoke more easily than I. I think there is a reason in the very nature of things, why men in general should endure privations and disappointments more cheerfully than women. As a class, been considered by my husband a they have more to occupy their minds model for economy and ingenious savin the way of outside influences and freshening employments. They are about the world more or less, even if it be merely in the business way, and do not feel the lack of recreation, visiting and journeying as does a woman, whose daily round is within the four walls of home. I have sometimes been wicked enough to think that, with the same opportunities of out-door air and exercise which Thomas has, I might be as cheerful under trials as he is; and, more yet, that if he were shut up day after day and week after week in a treadmill of work, as I am, he might house to use in place of buying new get as blue and downhearted as I conmaterials, and it was wonderful how fess I sometimes do.

We are plain farmer-folks, have a good but small farm all paid for, and are not much in debt, but there are our the thing. And all I saved in that way half-dozen children to be fed and clothed and educated, and in these hard times we have to calculate closely. We always have enough to eat, for farmers have the one compensation of being supplied by nature with some things which money often fails to procure, but you may be sure our clothing is not always of the nicest, or newest, or most fashionable make. And as for ready money—my purse is often empty for weeks together.

Perhaps I naturally have what is called "a contrary disposition." I know that from my earliest remembrance, when I was told, "you can't do so and so" (spelling "can't" with a large C), straightway I would be seized and possessed with a vehement desire to do that very thing.

An astute old lawyer once made this remark in my hearing: "The only way to attain a difficult object is to stick your stake there, and then go for it.' I thought of that remark as I pondered over the resigned helplessness with which Thomas had said, "We can't go," thereby arousing my natural perversity. And something within me said, "We will go to the Centennial. My stake is an abundance of eggs and only sold the had my bait on ahead all the same, and set up at Philadelphia, and now I'm

going for it."

But how? Our luxuries were not so numerous that, by cutting them off for a while, we could save money for the Nor did I know of any way in which I could earn it, for with doing my own work and sewing and caring for those six children, from three-yearsold baby, Belle, up to Henry, who was

It was a mild evening; what snow we had had was mostly gone, carried away by the late thaw. I stood lookfourteen, my time was all full. ing out of the window a moment just very afternoon Henry was going to plied, as he always does. "I'm no calm reply.—The lawyer gave in.

remember, just then, that drift was we had eaten them all, while my Centormed of little snow-flakes? What-tennial fund was certainly better off. ever it was, the analogy came swiftly. myself the old Scotch proverb:-

"Mony a little Makes a mickle."

Long after Thomas was asleep-in the dead year and a welcome to the now. new, I lay awake pondering and planning. The result was I decided to lay aside ten cents a day somehow.

Now don't laugh at my little economies and make-shifts, you favored with an inward glow of anticipation, daughters of fortune, if any such read and I trimmed it myself with ribbon my humble story; for even that was a large sum for me to save daily. Had Another dollar bought little ribbons, large sum for me to save daily. Had I only had a housekeeping allowance, or a dress allowance, as some women do, it would have been easier to save from it, but where could I exercise any more economy than I already used? And still pondering and planning, I finally fell asleep, the problem of "how lars saved there. to do it" yet unsolved.

that neither poverty nor untoward circumstances can take away the right for every one to be happy if he can. After all, what wealth could compare children, and carrying our lunch, and with our six bonny lads and lasses, a goodly circle as they sat around the brekfast-table? I believe I felt truly thankful that we were all spared in health to see the new year.

The breakfast dishes were hardly shawl over her head and a tin pail on her arm.

"I want to buy a gallon of soft-soap," she said. "Now don't refuse me, for I've got an old carpet I want to wash to-day, it's so mild and we're clean out o' soap. I've got a handsome lot o' soap-grease, but I can't think o' makin' soap till spring opens, so the leach can be sot up out doors."

We didn't often spare any soap, but I thought I might venture to now, and accommodate myself as well as her. She paid me two ten-cent scrips, which I laid carefully away in a snug corner of my upper bureau drawer. "There's my quota for to-day and to-morrow. after the rest of the family were abed, talking of various things, but most of and don't know a breath about it." the coming Centennial Exposition, a And I really exulted inwardly at my long account of whose wonders to be good beginning. It seemed a propi-

Monday, after washing, I cut out a print dress for myself, which had been some time waiting to be made. Thomas was going to town in the afternoon, and I invited myself to ride with him to get buttons, lining, etc., for my

"Here's a dollar for you," he said, when I told him what I wanted; "will that do for to-day? I'm a little short just now." (As if he wasn't "short" most of the time.)

"I'll try to make it answer," I replied, inwardly planning how much I could save out of it toward my fund. In the than ordinarily rebellious that night. fifteen minutes before he was ready I flew around, found an old dress-lining ing her hundredth birthday, but must I tons on an old wrapper that I might use on my new dress by taking buttons for the wrapper off from Henry's old summer shirts. But I rode to town all it be lost? Thomas seemed to take it the same, bought thread and some little things, and brought home seventy "Enough for another week," chucked I to myself, as I laid it away.

Every faculty grows by use; and I who had always considered myself and ing, now found that I was only in the alphabet of that art, and that there were undreamed of hights vet to be scaled. It is as true that we never know what we can do till we have tried, as that we never know what we can bear till we are tried. For when I came to really make it a study I found a most surprising number of things I could do without-little things each, but in the aggregate they were large.

Now whenever I made a garment for myself or any of the rest I set my wits to work to find something in the much I could find, things laid aside and forgotten long ago, but when unthe thing. And all I saved in that way I quietly laid aside, saying nothing to anybody. Had Thomas been one of those niggardly souls who must know just how and where their wives spend every cent they trust to them, my selfallotted task might have involved more or less quibbling and deception. As it was, he was never inquisitive as to how I spent the money he gave to me as I called for it from time to time. So the little fund in the back corner of the drawer grew slowly but surely.

Mrs. Smith came again and yet again for another gallon of soap, and I never refused her. Time was when I should have refused pay for so small a thing from a neighbor, though they were well-to-do people, with twice our income and half our expenses, but I was October, Thomas went so far as to say. very avaricious those days, when my avarice had a definite end and aim. Thomas happened never to be in when But things were not quite ripe for a she came, and never knew I was coin- disclosure. But if ever a woman flew ing money out of the soap-barrel. I spent two dollars out of the five in getting for myself a new plain hat "that would be just the thing to wear to the Centennial," as I told myself flowers and laces for the girls, and by doing over my old hat for Maggie Maggie's for Grace, and Grace's little Belle, and trimming them myself, we were all satisfactorily fixed up, and no one was the wiser for the two dol-

As the season came on for wild ber-"Happy New - years!" resounded through the house before day-break, in some as well as not, for there were so all keys and cadences. Thank God many little hands to pick them, that we did not need them all to use. We children, and carrying our lunch, and though we ate all the berries we wanted in the family, and I canned as many as I thought best, I sent many pails full into town; if by my husband, he always brought me the money very dutifully, as he "was sure I earned it," washed that Saturday morning when our neighbor, Mrs. Smith came in, a what use I made of it.

> My husband was occasionally away from home in the way of business for two or three days at a time, and always left me a little money to use if I needed to. Sometimes I would have no oc casion to use any, and he would call for it after his return, to use in making change or for some emergency. Now I began to look out for the sure growth of my secret fund, and each time I would lay by as much as I dared to, without being suspected of any plot. And yet it would be no more than I should once have used unhesitatingly and still called myself very economical. I was simply learning to take care of the half-pence as well as the pennies. Another thing I should properly have mentioned sooner, as I found it out very near the beginning of the year. I had been quite in the habit of buying little knick-knacks for the children whenever I went shopping, and really when one has three or four little one at home expecting mother to bring them something good, it doesn't seem much to spend fifteen or twenty cents in nuts and candies wherewith to gladden their eyes on your return. found this was one of the driblets which would swell in the saving as well as the spending, so I gradually weaned the children from the idea, and made them just as happy with the necessary articles I bought for them. Tommy forgot to ask for peanuts as I set him to trying on his new copper-toed boots, and little Belle thought no more of candy when I let her unfold the print for her new dress and aprons. They were just as well off, perhaps better, and my purse certainly was. think that we sometimes buy our chilcome to be appreciated, not for ourok for the "loaves and fishes, "a lesson which seems to be quite unnecessary to be taught to the present self-seeking generation.

But I cannot tell you all the ways that spring and summer and fall, for the limits of one paper would not be sufficient. I have told some of them, and every ingenious woman can imagine others. Suffice it to say that I succeeded in my self-allotted task beyond make up the deficiency as soon as possible, and not fall in arrears, for I found it counted up alarmingly. And among not going on uncertainties. the many thing I thus learned was the beauty of system in saving as well as off, and a little less than twenty-four in everything else. I decided also that hours swift car-riding brought us to it was best to have the sum determin- the Mecca of our pilgrimage—Philadeled on for daily saving so small that it phia. Thomas was not so enthusiastic, how could he be, not having my anticipations? But as the heat of the summer passed away, and the coolmore leisure he seemed to warm up to and I. the subject in inverse proportion to the weather. August and September saw many of our towns-people at the Board, 4 days at \$1.50 each, exposition, and the glowing accounts they brought back fired many before apathetic natures. And by the first of "I really wish we could go."

How I longed to tell him we could!

Who was it that said, "A man is Spring came on with its ham and springy and active just so long as he Now I began to think one was times felt as if I could remove mountains, not by faith, but by works. "Mother's getting stingy of her fried I cleaned the house from top to bottom laughed Henry one morning for the frosts had considerately killed when the egg-platter had emptied very quickly.

I pickled and preserved and canned. I got my fall sewing and "It takes so long to fry two apiece knitting along wonderfully, somehow.

"But what can we afford to do?"
"Well, we must afford to have you dressed respectably. A new would cost from ten to thirty dollars, I suppose, 'not much odds any way,' as the fellow said, what will it cost to have the old one repaired in good

"A new overskirt, buttons and lin-I pondered, "not more than ings.

"Well, then, get it out of the five, that's a dear," and he handed it right over. "I hope we shall see the day ometime. Jenny, when you needn't be scrimped for clothes, for you deserve the best of any woman in the land."

How pleasant it is to be appreciated! I put my wits into the dress business purchased judiciously, did my own repairing, and my dress came out "as good as new," and plenty good enough to wear to the Centennial, for less than three dollars. So the contribution for three weeks more was made up, and that nearly took me up to the amount had started for at the outset—thirty dollars. On Thursday the 26th of October, I counted up that amount to a penny, and put it in an envelope.

Thomas went to town that evening and came back with a more thoughtful air than usual. "Tickets to Philadelphia and return reduced to ten dollars, he said. "Think of that! Can't we spare the money somehow?"
"Well. how?" I asked, deceitful

wretch that I was.

"Sure enough," and he went to figuring, "We can't make out with less than forty dollars," was his conclusion after a while, and he laid down the pencil with a sigh which said the half-formed project was given up. But after the children were all abed, I laid the envelope on the table in front of him.

What is it?" he asked. "Only some little driblets."

He opened it, but at sight of the contents stared in speechless amazement. "Whose is it?" he inquired at length, 'what does it mean? I don't under-

"It is mine," I replied, "or rather ours, and it means that you and I will start for the Centennial on the 3 o'clock train next Monday morning to spend the week there."

"But how came you by it? whom have you robbed, or what gold mine have you opened?"
"I haven't robbed anybody unless it

is you, and the only mine I have opened is that of persistent systematic saving." Then I gave him, in a few words, an outline of the methods which had brought about the satisfactory pecuniary result before him.

"But I can't understand now how you managed to lay by ten cents a day," he said in a dozed fashion, "I'm sure I never missed it."

Ah! that was the beauty of it. He never missed it, neither did I, it seemed hardly to have cost any effort, and yet, what a beautiful pile of silver and scrip and bills it made as it lay there on the table, beautiful because it had come so easily, and was to bring us so much happiness. All the little selfdenials, the make-shifts and contrivances I had been forced to use to accomplish my purpose, faded out of sight in that supreme moment.

"I can hardly believe either my eyes or my ears," said Thomas, at length.
"I must be dreaming. Who would have thought this possible? But here is a ten to add to your thirty, and to dren's affection too much, so that we the Centennial we will go, God willing. If you haven't earned the trip, I wonselves, but for what we bring them. In der who could? I'll save the ten myour mistaken fondness for them, we self before the winter is over if you'll tell me how

Doing a Lawyer.-A well-known oung solicitor obtained a divorce for a pretty and wealthy client. He sent in a bill for \$2,000. The next day the lady called on him, and inquired if he was in earnest in proposing to her.—
"Propose to you, madam! I didn't propose to you," replied the astonished lawyer.—"Well you asked me for my fortune, and I thought you would have "Just which you think best," he rethe grace to take me with it," was the soundness.

"Line and a repeal of the control of the best index to its soundness."

HENRY C. WENTWORTH, G. P. & T. A., Chicago.

Romance in Real Life.

St. Paul Globe,

An extremely singular affair transpired in this city last week, the actors in which are highly respectable citizens residing at present on Tenth street Some twenty years ago there came to a far-off Eastern city a young man, whose pleasing address and engaging habits soon won the hand and heart of one of the reigning belles of the Orient metropolis.

There were lights, music, joy, priestly words,—a wedding; the former maiden being now known as Mrs. Lit-

A few short years and there appear ed a shadow, at first about the size of a man's hand; afterward a shutting out of the joy and the sunshine; then chaotic darkness. The fatal eclipse is death! Years of mourning followed, sanctified by the tears of grief. Time came, and over the urn of the mourned sprang the perennial flower of hope

A second suitor, named John Sawver, appeared, and the star so long buried in the shadows rose again in the ascendant. Vows were pledged, and the confiding widow became again a wife. A child was born, and for a brief period partook of the sweetness of Heaven.

The shadows again fell. Before, the sorrow was tender,—it was dead. Now, it was hideous,-it was living.

From bad to worse, the husband be came cruel. His blood was inflamed by drink. Long years of patient, horrible suffering followed,—then a di-

The Far West was sought as a welcome refuge.

After some years a third husband sued for the hand of the sad but still blooming woman, and life was again roseate. They were married, Mrs. Sawyer be-

coming Mrs. E. M. Raymond, and for a number of years they have been residing in this city. The infant of four years had be-

come a graceful, bright-eyed maiden. A few years since there came to the door of the happy home on Tenth-street a man who looked the boon companion of Trouble. He was subdued, respectfirmly in the sand. The unsuspecting able, and prematurely old. quadruped pranced joyfully along until

The call was answered by a motherly-faced matron, who beheld in the visitor the father of her child and her former husband. The situation is not easily described. There are some pictures in life from which the veil should not be lifted-some heart-throes, the exposure of which would be desecration. He had repented of his folly, and reformed; had embarked in business and was now rich.

He piteously pleaded for an opportunity to see his child. He was rich in this world's goods, and would endow her bountifully.

The request was granted. It was a meeting of spring and winter. Strange The shock was fatal. Spring con-

quered. The husband came home and was told the story, and, being a sensiole man, understood. Thus was avoided a scene.

The former husband was prostrated with a fatal illness. Charity conquered, and he was tenderly cared for.

On Thursday he died, surrounded by friends, and ere the light was shut out from the dead on Friday, the upturned face was wet with the dew of genuine

The following excellent practical advice is from the Manufacturer and Builder: How strong should coffee been and still it the commonest step-be taken is an inquiry of much practi-How much should be cal importance. taken at a meal is scarcely of less momay wholly ruin the health; the very use of it tends to this, as certainly as does the use of wine, cider, beer, or any other artificial stimulating drink. There is only one safe plan of using coffee, and that is never, under any circumstances, except of an extraordinary character, exceed in quantity, frequency, or strength—take only one cup at the regular meal, and of a given unvarying strength. In this way it may be used every day for a lifetime, not only without injury, but with greater advantage than an equal amount of cold water, and for the simple reason that nothing cold should be drank at a regular meal, except by persons in vig orous health. We have personall known of the case of a lady who wa for a long time in poor health, to the mystification of several physicians whom she consulted, when at last we discovered that she made a most ex travagant use of strong coffee many times a day—in fact she had a pot coffee always at hand. Following the advice to abstain from coffee resulted in an immediate end of all her trouble

"Do you know when the swallow homeward fly?" asked a young man o his "inamorata," as he leaned over the piano-forte. "Of course I do," she re plied in a voice as far apart as the teetl of a barber's comb. "They fly home when they want their grub." And ther she began to sing, "Would I were a bir-r-d.

The question of substituting iron gray pantaloons for the traditional relower garments used by the soldiers of France is being agitated, the object being to secure a uniform safer from the enemy's fire in battle.

The other day, in the barracks, Se geant Major Pecon addressed an in terpellation to Corporal Pitou, who frequent potations have given a nes

of a lovely vermillion tint.
"Corporal," said he, "You'll have change that nose "But I can't, Major."

"But it's orders. Here they are the paper: 'No brilliant colors, such are likely to attract the enemy's fir will be permitted.'

In selecting timber for use, choose healthy, vigorous and flourishing tree Those in which the trunks are mo even are to be preferred. A mark decay is generally detected in a swelling above the general surface the wood. Dead branches especially the top of the tree, render it suspicious

The Valentine.

BY GEORGE MELNOTTE GRUMMOND

I send thee a message, my lady, I send thee a message to-day

On the pinions of hope and of gladnes
My messenger hies away.
O guess at the secret he carries!
Guess what I send to thee!
And guess why so gaily and swiftly My messenger goes from me.

I know whose eyes are the brownest
Of all brown eyes in the land!
And to her my messenger hastens,
To lay in her dainty hand,
A secret my heart hath cherished
For many and many a day,
Till now for thine answer, lady, My secret bath flown away. For this is the time when maidens

Are choosing a valentine; Choose thou, oh, fairest of maidens! Choose thou this heart of mine!

And loval and true shalt thou find me

Come days that are dark or light-o this is my message, dear lady, Send thou a glad answer to-night.

Anchoring a Horse. They tell a good story on an old mar-

iner who keeps a little hotel down here. writes a correspondent from Coney Island. His wife was very anxious to have a horse, an animal in which the old gentleman took but little stock, and the old lady finally won her point and got her horse. The steed was of an erratic and playful disposition, and used, on the least provocation, to tear madly along the beach, and succeeded in spilling the old lady out several times. At last the captain, who had never driven the beast, volunteered to break him of his vicious habit, so getting another old salt to assist him, he procured a kedge anchor with a stout line attached. Fastening the end of the line around the axle, and putting the anchor in the wagon, the fiery untamed was hitched up, and the two old gents started out for a drive along the shore. Soon the vivacious charger espied something which gave him an excuse to run away, and immediately dashed off with a frightful velocity. The captain dropped the reins and summoned all hands to "let go the anchor."

The anchor was let go, and caught

FUTURE GREATNESS.

SIX STORES, A HOTEL, AND AN OPERA HOUSE TO BE BUILT.

Fer some weeks past Ypsilanti has been astir with the bustle attending one of the largest business projects this city has ever known. The facts now first detailed have been in our possession for several weeks, but have been withheld from the public until the negotiations were completed. The project embraces no less than five new stores, a new hotel, and an opera house. The stores will be built and occupied by young and energetic men, men who have all of them built up a large trade; so that the new enterprise, so far from being a speculative one, is of the most solid business character. Although the present high rents on

Congress street make it cheaper to own than to rent stores, we think that the lowered rents which will result from the increased accommodations will be but temporary; for in the end business will be concentrated on this side of the river and the increased demand for store room will again bring rents up.

It is hard to overestimate the advantage Ypsilanti will gain from the new enterprise. The surrounding property on Washington and Congress streets will be made much more valuable; the work of building will give employment to many workmen, and in general, business will receive a new impetus. All the papers have been made out and each new proprietor has his deed. All of them are under bonds to finish building before October 1, and the contract for building the hotel will, when drawn, call for the completion of the building inside of four months.

THE GENERAL PLAN. It is proposed to divide the present Hawkins House into two parts, one part (20x60 feet) is then to be moved back and made to front on Washington street, while the other part will form the dining room and kitchen of the new hotel. The present site of the Hawkins House will be occupied by a brick building containing six, possibly seven, new stores. The building will be two stories in height and the upper floors will be used in some cases as offices and in other cases for residence. The new building will cover a space of $120 \times 97\frac{1}{2}$ feet, and will be separated from the wooden building in the rear by an alley 20 feet wide. The barns of the Hawkins House will be directly in the rear

The store on the corner of Congress and Washington streets will be occupied by J. SANDERS.

Mr. Sanders will enlarge his clothing busi ness by adding a large line of children's clothing and by a general increase in the stock. The second story will be occupied by law offices, one of which has already been spoken for. The third floor will probably contain the tailoring department, and the basement will be fitted up for a barber shop. Mr. Sanders has a lot 20 feet wide by $79\frac{1}{2}$ feet deep. The next lot has a front of 44 feet and will be occupied by THE HARRIS BROTHERS.

They will build two stores, one for their own occupation and oue to rent as a dry goods store. The entrance to the upper floors will be between these two stores; a wide passage on the first and second floors, running lengthwise of the building, will give ccess to all the offices. Next to the Messrs Harris, Mr. J. Sanders will build a second store with a front of 18 feet. The next store, with a frontage of 20 feet will be oc-

WALLACE AND CLARKE.

This firm will have practically a four story building; the basement, eight feet in height, will be occupied by furniture, as will also all the floors above. This will give Ypsilanti probably the largest furniture warehouse in Washtenaw county. The store at the west end of the block, having a frontage of 18 feet, will be occupied by

Who will remove thither her millinery rooms. The upper floors will be occupied by Mr. and Mrs. Curtis as a residence, and for their accommodation the rooms will be connected with

THE HOTEL.

It is not yet definitely decided whether the hotel will stand on the east or the west side of Mr. Hawkins' residence, all depending on whether a seventh store is added to the block. But however that may be, the new part will be about 30x52 feet, and will be of brick. The lower floor of Mr. Hawkin's resdence will be converted into a ladies' parlor, a square room occupying the front of the house, and a gentleman's drawing room in the rear of the ladies' parlor. The ladies' entrance will be where the entrance of the

The new part will contain, on the ground floor, a large front office, two sample rooms, wash rooms, etc.; and in the upper stories, six suits of two rooms each, and a number of single rooms. The hotel will accomodate in all forty persons. The dining room and kitchen will be placed in the rear of the main buildings, with which it will be connected by a brick passage-way. The two rooms will occupy a space of 30x40 be located, and the third story will be fitted

up for servant's quarters. THE OPERA HOUSE.

The opera house plans are the only ones connected with the new enterprise which are not yet matured. The building will stand between Mr. Hawkins' residence and narrow passage way, separating it from the will be comfortable, safe and convenient. The site will be equally advantageous to all the merchants on the street, and would seem to be, in the light of the other improvements, the best location that could be se-

It is estimated that each store will cost, exclusive of the lot on which it stands, \$3,-000; the block of stores will cost \$30,000, and the entire improvement will represent an outlay of not less than \$50,000. It is the determination of the builders that this meney shall be spent, as far as possible, in Ypsilanti, and that our city shall reap as much benefit as possible from the improvement. Within thirty days the place that once knew the Hawkins House will know it no more forever, and in a few months more the city will be the better off by a handsome block of buildings.

"One touch of nature," observed the inebriate as the ground rose and struck him.

The following explanation of a legal term is offered by a Teutonic member of the police force: "Ven I git me out a habeas scorpious, I can chust so vell catch a man where he ain't as where he is.'

SHERIFF'S SALE. STATE OF MICHIGAN, County of Washte-

STATE OF MICHIGAN, County of Washtenaw, ss.

By virtue of a writ of execution issued out of and under the seal of the Circuit Court for the County of Washtenaw, to me directed and delivered, where in Albert H. Roemer, survivor of himself and Gustave Iliges, is plaintiff, and Frank Tooker is defendant. I did, on the 18th day of February, A. D. 1879, levy upon all the right, title and interest of the defendant therein named in and to the following described real estate, to wit: Lot No. 2, in Hunter's addition to the village, now city, of Ypsilanti, Washtenaw county, Michigan, which property I shall offer for sale at public vendue, to the highest bidder, at the Court House, in the city of Ann Arbor, Washtenan county, on Wednesday, the 9th day of April, A. D. 1879, at 10 o'clock in the forenoon.

Dated, Ypsilanti, February 13, 1879.

JOSIAH S. CASE, Sheriff.

By John Sheemeld,
Clarenge Tinker,
Plaintiff's Attorney.
